ACKNOWLEDGEMENT

I take this opportunity to express my gratitude to the three great scientists of our country, Dr Vikram Sarabhai, Prof Satish Dhawan and Dr APJ Abdul Kalam, who gave me the opportunity to get trained under them on various management systems. While Dr Vikram Sarabhai gave vision to our country through the space programme, Prof Satish Dhawan brought mission approach and innovative management system for successful execution of the programmes and Dr APJ Abdul Kalam, the most practical eminent scientist of our country, inspired home grown techniques & management methods to dominate our missions. Dr Sarabhai taught me perspective planning and vision to look 10 years ahead. Prof Dhawan taught me systems analysis and quest for excellence and perfection. Dr Kalam taught me during my two decades of working with him, the unquenching effort to bring innovative approaches of projects management and concept of shared values. It is he, who inspired me to undertake research in this area.

Prof Ashok Joshi, Founder Dean, Management Faculty, University of Pune and Director, Indian Institute of Cost and Management Studies & Research, Pune, my respected research guide, was solely responsible for the framework to approach the research problem which culminated into a universal model that can be applied for any R&D project. He directed and channelised all my experiences and effort into a useful research by his continuous guidance and by suggesting the appropriate research design methodology and benchmarking. I am greatly indebted to Dr Ashok Joshi for his valuable direction and guidance. His high level of knowledge, sound theoretical base and practical approach greatly supplemented the experience of the researcher and resulted in the development of the present model in a short time.

The researcher expresses his gratitude to Dr B Bowonder, Dean of Research and BEL Chairperson on Technology Management, Administrative Staff College of India, Hyderabad, for his valuable suggestions and help during the present work. I am thankful to Lt Gen (Dr) VJ Sundaram, Director, DRDL for giving permission to undertake this research. I am also indebted to my colleagues Shri K Srinivasa Rao, Shri Suresh Mathur, Shri L U Sankar for their assistance in the preparation of case studies, graphics support and programming support. I am also thankful to Shri M Srinivas for his assistance in typing this report.
