List of Tables

Table : 3.1  CCV for Major and Trace elements
Table : 4.1  Rainfall, Mean and standard deviation of temperature
Table : 4.2  Comparison of physicochemical parameter with various mangrove region around India
Table : 4.3  Physico-chemical composition of water recorded at the study sites in stations
Table : 4.4  Trace metals of water recorded at the study sites in stations
Table : 4.5  Macro nutrients of water recorded at the study sites in stations
Table : 4.6  Physico-chemical parameters recorded at the study sites in months
Table : 4.7  Trace metals recorded at the study sites in months
Table : 4.8  Macro nutrients recorded at the study sites in months
Table : 4.9  Seasonal variation of physico-chemical parameters
Table : 4.10 Seasonal variation of Trace metals
Table : 4.11 Seasonal variation of Macro nutrients
Table : 4.12 N: P ratio of surface and bottom waters
Table : 4.13 Nitrate: Phosphate ratio of surface and bottom water
Table : 4.14 Pearson correlation - Premonsoon
Table : 4.15 Pearson correlation - Monsoon
Table : 4.16 Pearson correlation - Postmonsoon
Table : 4.17 Factor analysis - Premonsoon
Table : 4.18 Factor analysis - Monsoon
Table : 4.19 Factor analysis - Postmonsoon
Table : 4.20 Classification of elements using cluster analysis
Table : 4.21 Paired sample t-test of Physico chemical composition in stations
Table : 4.22 Paired sample t-test of trace metals in stations
Table : 4.23 Paired sample t-test of macro nutrients in stations
Table : 5.1 Mean and standard deviation of parameters on surface sediments in stations
Table : 5.2 Monsoonal changes of pH and EC in surface sediments
Table : 5.3 Monsoonal changes of calcium carbonate and organic carbon in surface sediments
Table : 5.4a Correlation matrix – Premonsoon
Table : 5.4b Correlation matrix – Monsoon
Table : 5.4c Correlation matrix – Postmonsoon
Table : 5.5 Surface sediments Characteristics of Manakudy estuary
Table : 5.6a Grain size in stations – Premonsoon
Table : 5.6b Grain size in stations – Monsoon
Table : 5.6c Grain size in stations – Postmonsoon
Table : 5.7 Descriptive statistical analysis for the grain size parameters
Table : 5.8a Descriptive statistic sediment remarks - Premonsoon
Table : 5.8b Descriptive statistic sediment remarks - Monsoon
Table : 5.8c Descriptive statistic sediment remarks - Postmonsoon
Table : 5.9 Summery of grain size statistical parameters (in percentage of the total number at each sector)
Table : 5.10a LDF sediment remarks - Premonsoon
Table : 5.10b LDF sediment remarks - Monsoon
Table : 5.10c LDF sediment remarks – Postmonsoon
Table 6.1a Nutrient distribution in surface sediments of the Manakudy estuary – Premonsoon
Table 6.1b Nutrient distribution in surface sediments of the Manakudy estuary – Monsoon
Table 6.1c Nutrient distribution in surface sediments of the Manakudy estuary – Postmonsoon
Table 6.2a Correlation-Premonsoon
Table 6.2b Correlation-Monsoon
Table 6.2c Correlation-Postmonsoon
Table 6.3a Nutrient ratio of surface sediment- Premonsoon
Table 6.3b Nutrient ratio of surface sediment- Monsoon
Table 6.3c Nutrient ratio of surface sediment- Postmonsoon
Table 6.4a Major element Variation in surface sediments of Manakudy estuary – Premonsoon
Table 6.4b Major element Variation in surface sediments of Manakudy estuary – Monsoon
Table 6.4c Major element Variation in surface sediments of Manakudy estuary – Postmonsoon
Table 6.5a Al normalization of surface sediments – Premonsoon
Table 6.5b Al normalization of surface sediments – Monsoon
Table 6.5c Al normalization of surface sediments – Postmonsoon
Table 6.6a Trace elements of surface sediments of Manakudy estuary – Premonsoon
Table 6.6b Trace elements of surface sediments of Manakudy estuary – Monsoon
Table : 6.6c Trace elements of surface sediments of Manakudy estuary - Postmonsoon

Table : 6.7a Al normalization and element enrichment factor for trace elements in surface sediments – Premonsoon

Table : 6.7b Al normalization and element enrichment factor for trace elements in surface sediments – Monsoon

Table : 6.7c Al normalization and element enrichment factor for trace elements in surface sediments – Postmonsoon

Table : 6.8a Major oxide (Al₂O₃–(CaO* + Na₂O)–K₂O) (A-CN-K) data for surface sediment- Premonsoon

Table : 6.8b Major oxide (Al₂O₃–(CaO* + Na₂O)–K₂O) (A-CN-K) data for surface sediment- Monsoon

Table : 6.8c Major oxide (Al₂O₃–(CaO* + Na₂O)–K₂O) (A-CN-K) data for surface sediment- Postmonsoon

Table : 6.9 Comparison of certain metals and average shale from present study reported with earlier work
