Acknowledgements

Words are not enough to thank my teachers, friends and colleagues who contributed and extended their valuable assistance in the completion of this study. It is a pleasure to convey my gratitude to a very few special people.

Foremost, I would like to thank Dr. Sanjay Kumar for proposing the research topic and introducing me to the field of plant molecular biology. His apt criticism, inspiration and his ingenious tenacity in overcoming every difficulty helped generate a sense of confidence in me.

My sincere thanks are due to Dr. Paramvir Singh Ahuja, Director, CSIR-IHBT and Dr. Anil Sood, Head, Biotechnology Division for providing me the necessary facilities and for their constant encouragement. I would extend my sincere thanks to Dr. Arvind Gulati for the guidance and help extended during enrolment, registration and submission of Ph.D.

I would like to extent my sincere thanks to Dr. Som Dutt for teaching me, the basics of metabolomics and liquid chromatography. I would like to thank him for all helpful discussion and ideas.

I would like to acknowledge Dr. Ravi Shankar, for carrying out bioinformatics analysis of the transcriptome data reported in my thesis.

My sincere thanks to Prof. Prabjeet Singh, Head, Department of Biotechnology for the kind help extended during thesis submission. I would like to thank Dr. Pratap Kumar Pati, Department of Biotechnology, for his kind help during enrolment and registration to Ph.D. I would like to thanks all the teaching and support staff of Biotechnology department, Guru Nanak Dev University, Amritsar for making my stay at university during my course work, comfortable and educating.

I would like to acknowledge Indian Council of Medical Research, Government of India, New Delhi, for providing financial assistance in the form of Junior and Senior Research Fellowship.

My warm thanks are due to all the members (past and present) of our working group in plant molecular biology; Dr. Sanjay Ghawana, Dr. Pradeep Kumar, Dr. Richard Chalo Muoki, Dr. Harsharan Singh, Dr. Ravi Shankar Singh, Dr. Arun Kumar, Dr. Hitesh Thakur, Dr. Tabassum Kawoosa, Dr. A. Paul, Dr. Dharam Singh, Sewa Singh, Aditi Thakur, Anish Kachara, Deepmala, Anita Kumari, Shweta Sharma, Rupali, Geetika, Shruti, Jyoti, Reema, Mittal, Surbala, Tanvi for the supportive atmosphere. Thanks to Mr. Digvijay Singh Naruka for his excellent technical assistance in sequencing. I would like to thank Ms. Anupama Saini for her immense help in plasmid isolation and Arabidopsis seedlings transfer. Special thanks to Mr. Deepak Sood and Mr. Babloo for taking care of my plants in field and plant growth chambers.
Acknowledgements

Special thanks are due to my friend, Anita for her constant support and help during my
days of research, I will always remember the time we spend together.

I am indebted to Dr. Tabasum Kawoosa for training me in molecular work during my
initial days. She always seems to have solution for all my research problems. I would also like to
thank Russia Chand for helping me with the bioinformatics part and manuscript writing.

Finally, to my amazing family for their invaluable love, patience, support and
understanding throughout the time of the study. My mother and father constantly supported me,
and pushed me hard in all my pursuits. My brothers constantly bear my periods of frustrations
with supporting words.

I cannot express in words, the support given by my life partner Ashish. He voluntarily
missed out on so many family gatherings and functions just to allow me to continue with my
work and encouraged me in perusing my dream. I know it was difficult for you to do all the
cooking after long day of hard work and I am grateful for you to do so without me. It would have
been impossible for me to continue my work without your infinite support and lots of
understanding.

Above all, I thank God for the gift of life, good health, encouraging and supporting
family and comfort during anxious and uncertain moments.
