

## **ACKNOWLEDGEMENT**

*First and foremost, I thank my PhD supervisor Professor Vikram S. Ghole, who transcended from being a guide for my PhD programme to my Guardian in real life. Even through regular monitoring of my work progress, he had provided me abundant liberty to think and explore. This had gone a long way in shaping my habit and flair for logical thinking in day to day life as well as in my career. His encouragements and advice echoes in my ear and I thank him for all I am today. My knee down obeisance goes to thee, 'Sir'.*

*I am equally grateful to my Co-guide, Dr. C.I. Jose, without whose support, I could never accomplish my dream of completing this work. Generically a pharmacologist, elucidation of chemical structures had been a difficult aspect of research for me. Dr. Jose provided his valuable experience in this area for which I am always thankful to him. His attitude to reach perfection at all stages was a lesson I carried all through the period of my work at the University.*

*I do not have words to thank my wife and colleague Anita for her encouragement and help. The difficulties appeared surmountable when she was around and without her support and effort I could never have reached my objective. A true compatriot in life, she had walked with me across difficult terrains only to cross them. Her care and affection always made me feel that completion of this work is only a slice of time away, only to be reached and conquered. I thank her for being with me throughout my work.*

*I am indebted to Dr. Pratap N. Mukhopadhyaya,, an ex-scientist of National Dairy Development Board, Anand, a classical molecular biologist and currently the CEO, Geneombio Technologies Pvt., Ltd. Pune. He was responsible for introducing and conceptualizing the molecular biology aspect of this study and also in guiding me during compilation of the thesis. Even among the busiest schedule he left no stones unturned to help me with all his valuable and finest suggestions that had led to give the final shape to this thesis.*

*I also extend my thanks to Dr. Deopurkar from department of Microbiology, University of Pune for his assistance in design some of the in vivo and susceptibility test protocols for my compound and also for giving me valuable suggestions to improve upon the work. I also wish to put on record my sincere gratitude to Dr. Bhonde and his student Mr. Ravi Shukla from NCCS (National Centre of Cell Science, Pune) for sharing their valuable time and space for the cytotoxicity study of the compound.*

*Thanks are due to Dr. Rohini Devi and Manjiri Joshi from Geneombio Technologies Pvt., Ltd., for their help in analysis of the MecA gene. I also thank Dr. Enayat, an Iranian student from the department of Microbiology, University of Pune, who at the beginning of my work assisted me in learning basic microbiological techniques. My special thanks are due to Dr. Mihir Hajarnavis MD, ( Ayurveda), for all his help in selection of plants and providing valuable ayurvedic information.*

*My special thanks to Mrs. J.P. Choudhari, Mr. A.P. Gadgil, Mrs. V. S. Shinde and Mr D.S. Shishupal from Shimadzu centre, Chemistry department for their invaluable support for all the analytical techniques used for the structure elucidation of molecules. I also wish to thank Dr. Kishori Apte for helping me in the different pharmacological studies.*

*Through out my whole course of research work and my days in University of Pune and more specifically in chemistry department, I had cultivated dozens of friends and well wishers. They were always with me when I needed their help. Among them, I wish to specially thank Dr. Sangeeta Bhagwat., Geetanjali Litake., Dr. Milad, Dr. Nandkumar Somwanshi, Upendra Gumaste. and Zahara for their support and encouragements.*

*I thank Dr. Sangeeta for introducing me to Prof. Ghole that in turn facilitated my registration for PhD. Miss Gitanjali and Mr. Upendra were always beside me and helped me in innumerable occasion till the end. Gitanjali came a long way with me when both of us were in graduation and helped me in all difficulties right from the first day. Special thanks are also due for Dr. Uday Goswami and Dr. Suresh Joshi were immensely helpful at the initial phase of the work.*

*My bio-organic part of the work needed an organic laboratory support without which it was difficult to perform some of this work. Assistance in this regard from Dyaneshwar Gaikwad., Mahadev Shinde., Anuruddha Doke., Dilip Sathe and Madura Rale is gratefully acknowledged. . I also wish to extend my sense of gratitude to Atul Bhagwat, Kaustubh Joshi, Vivek Barve., Ajit Zambre, Vishal Kulkarni and Sh ankar Markad, for their assistance in elucidating the structure of my molecule at its initial phase.*

*I have no word to thank my parents and my sister, Kuchi, who always encouraged me to go ahead with my work. My parents, despite passing through problems had always dreamt of me completing this ambitious work. My father, even in his old days, was always a shield to me to protect and a constant encouragement to complete the work in amidst all adversaries.*

*I am highly thankful to Mr. Sharad Purohit (MD, Resilient Cosmeceuticals Pvt. Ltd., Pune), where I was employed during a major period of my work programme. Heartfelt Thanks are due Mr. Sachin Purohit and Dr. Kedar Joshi for their moral support and help which was behind my strength to take up such a work. I also thank my friends Arti H., Shekhar Surve, Abhay Mantrawadi, Urvashi Dutta, Dr. Ranjit Wagh and Mrinal Virkar, for all their moral support and helps in so many ways. I will equally thank Mr. Bhagat who introduced me my Co-guide Dr. Jose. My thanks are also due to the administration section of the Department of Chemistry, University of Pune to provide me the space for my work.*

*Last but not the least my thanks go to my tiny four year old, loving daughter Shibani, who had helped me through out the years by sacrificing her own time she deserved, out of mine. She always understood the situations and never complained about a problem.*

*Last but not the least, thank and gratitude are due to all who directly or indirectly assisted me in completing my PhD research programme.*

**-Bikash Ajit Aich**
