ACKNOWLEDGEMENTS

In my journey of achieving a doctorate, many people have been of tremendous help, support and encouragement. I take this opportunity to thank all of them, though I might forget to mention a few of them.

I consider myself very fortunate to get an opportunity to work under Dr. C.G. Suresh. From him I have not only learned the working etiquettes and fundamentals of crystallography in great details but have also learned the art of doing things patiently and to perfection. Throughout this long period of research he has been extremely supportive to me in innumerable ways. He has always allowed me to explore science in the way I wanted and has always extended his full support and given ideas wherever required. Sir and Indu madam have both been very affectionate and it has always given me a very cozy feeling, besides Shruti & Neethi have always given a very cheerful atmosphere. I fall out of words to express my thanks to all of them.

Our collaboration with Sushama madam has been scientifically very fruitful and it has also extended to friendly terms. I will always be grateful to her for whatever she has done for me throughout my research.

I take the opportunity to thank Dr. M.I. Khan for his constant guidance and for giving valuable suggestions which helped me to go ahead and try out different experiments. Again I thank him and Dr. Vidya Gupta for being my Ph.D. committee members, Dr. Jayant Pal from the Department of Biotechnology, University of Pune for being in my Ph.D assessment committee and giving his timely suggestions.
I express my heartfelt gratitude to Dr. Eleanor Dodson from YSBL, UK who helped me solve problems related to the structural work and promptly provided her most valued help in spite of her very busy schedule. I also thank Dr. Guy Dodson for his encouraging suggestions.

Our collaborators, Dr. SV Bhide and Dr. Rakesh Kestwal have provided me pure *Erythrina indica* lectin and I thank them sincerely. I also express my sincere thanks to Dr. Singh and Dr. Vikram Dhuna for providing purified SGA and ATL and giving a free hand to conduct experiments on those lectins.

I am grateful to Dr. Shama Barnabas for her time to time suggestions and making the atmosphere in our lab very cheerful with her esteemed presence. I am thankful to Dr. Shirgurkar for providing me with tamarind seeds.

I sincerely thank Dr. M. V. Badiger (Division of Polymer Sciences, NCL); Dr. MRN Murthy (MBU, IISc, Bangalore) for allowing me to use the Fluorescence and CD facility in their respective departments. I thank Gayathri and Sonali for being supportive during these experiments.

I take the opportunity to thank all the scientists and students of biochemical division, NCL for their help whenever required.

My labmates have always provided me with a very comfortable and positive feeling in lab, by always extending their help in all the possible ways. They have always provided a very cheerful atmosphere along with being great friends. I take the opportunity to thank Anuradha, Manish, Satya, Priya, Suresh Kumar, Uma, Urvashi, Nishant, Manas, Tulika, Payal and Srijith. Special thanks are due for Uma, with whom I have spend some very good time in hostel and who was a good company always; and to Suresh Kumar for helping me in every possible way and being a close friend. I especially thank Manas, Payal and Tulika for their extensive efforts in
correcting my thesis with a friendly and sincere attitude. I will always remember their help in this crucial period. I also thank the people who helped me even though they were associated with our lab for short duration: Raamesh, Nitin, Ashish, Ratnarekha, Mithila and Sharad. I am grateful to Ashish for his help in conducting experiments.

I will always remember and I thank all those people staying in and around NCL for being good friends and helping me in need. They include my very close friends Abhishek, Sharmili, Feroz, Sambhaaji, Sudarshan, Anand, Sridevi, Ashwini, Vinod and Anamika. I take the opportunity to thank Abhishek for providing me with his laptop in my last and most important phase of thesis writing and for being a great company always. Shambhaji and Sharmili have been very good and ever supportive friends. Some other friends who have been very helpful are Atul Fairazi, Deepti, Ambrish, Shabab, Sachin, Ashwini Poopal, Sofia, Gayatri, Radhika, Gyanprakash, Aarohi, Anish, Ajit, , Sreekanth, Sajid, Ansari, Asad, Jayprakash, Ashutosh, Shashi, Atul Thakur, Nagraj, Avinash, Sathish, Ashwini, Gayathri, Vajayanti, Radhika, Rashmi, Gowri and Shilpa.

My school friends Paridhi, Manish, Indrayani and Riddhi have always encouraged me and have given good refreshment to me in their wonderful company from time to time. I will always remember our good times together. I also thank a few friends Shivani, Tamali, Shankar, Priyanka, Partho, Anuja, Mukul, Suchi, Wanu, Prabhu, Swapna and Mandar who lifted my spirits up.

I acknowledge the help provided by Takalkar madam, Ph.D department, University of Pune for making the university process very smooth and convenient. I also thank Ms. Amrita, Mrs. Indira, Mr. Mari and Ms. Satyali for their help in administrative work. Mr. Karanjkar and Mr. Trehan are acknowledged for their technical assistance.
I acknowledge the Director, NCL; Head Biochemical Division for providing me with the working space together with all the facilities.

My family members have been my greatest strength and support to me all the time. I owe my doctorate to them. It is only because of the positive backup; understanding and encouragement provided by my father-in-law and father, the loving care and sweet support of both mothers that I could achieve this degree. It is hard to describe in words the role of my husband Nachiket at every step of my work; understanding all my problems, helping me in every possible way and making it possible to reach the end successfully. My siblings Avanti & Satyakam have been extremely sweet, understanding and supportive all the time and I owe a lot to them. I am grateful to all my very close relatives who have been with me throughout this period and who have also made my stay in Pune a memorable one.
