ACKNOWLEDGEMENT

First of all, special mention goes to my Ph.D. supervisors, Dr. Mukesh Kumar, Assistant Professor, Electronic Science Department, Kurukshetra University, Kurukshetra and Prof. Dinesh Kumar, Professor, Electronic Science Department, Kurukshetra University, Kurukshetra, for their continuous support, guidance and encouragement at all stages of my research work. You have been tremendous mentors for me. I would like to thank you for encouraging my research and for allowing me to grow as a researcher. Your advice on both research as well as on my life aspects have been invaluable.

My profound gratitude goes to Prof. B. Prasad, Professor, Electronic Science Department, Kurukshetra University, Kurukshetra, for his endless help and guidance. I found a generous person in him who is always ready to help and encourage the students through his various activities. He was always there for me with his scientific advice, knowledge and many insightful discussions and suggestions.

I would like to appreciate the cooperation of Prof. Anil Vohra, Professor, Electronic Science Department, Kurukshetra University, Kurukshetra and Prof. Anurekha Sharma, Chairperson, Electronic Science Department, Kurukshetra University, Kurukshetra. Their supportive nature made all Ph.D. related academic processes easier and faster.

I am grateful to Prof. C. C. Tripathi, Director, UIET, Kurukshetra University, Kurukshetra, Dr. A. K. Paul, Chief Scientist, Agrionics, CSIR-CSIO Chandigarh and Dr. Sachin Tyagi, Scientist, Agrionics, CSIR-CSIO Chandigarh for providing me opportunity to carry out research work in their labs.

I would like to acknowledge my seniors Dr. Amanpal Singh Clair, Assistant Professor, University of Rajasthan and Dr. Anuj Kumar, Research Associate, IIT Delhi for their encouragement and suggestions in the beginning of this research. It was a nice experience to work on and learn various instruments in their presence.

I express special thanks to my colleague, Ms. Sumita Rani, for her technical and moral support. It was because of her humble and friendly nature that both of us grew together without any single dispute in the lab.
I am thankful to all the teaching and non teaching staff members of Electronic Science Department, Kurukshetra University, Kurukshetra, for their support and nice behavior. Especially I feel pleasure to thank Ms. Mamta Hans for proper documentation of my Ph.D. record and Ms. Anguri and Ms. Shimla for keeping the lab clean.

It gives me great pleasure while acknowledging my colleagues Ravi Verma, Anil Gujjar, Rakesh Narwal, Sachin Chawla, Sumit Chaudhary, Rajesh Kashyap and Sanjay for creating healthy and joyful work environment. When research gave mental pressure, jocks cracked in the groups of these guys really balanced it. The doors were always open for technical and social discussions which enhanced the technical knowledge as well as social awareness.

I share the credit of my work with my family, who always stood by me with a smile. I have no words to express my respect and thanks to my father Sh. Bharat Bhushan Sharma, my mother Smt. Shashi Sharma and my elder brother Mr. Jitender Sharma. It is only because of them that I could start and complete my Ph.D. without any financial or mental stress. Innocent smiles and queries of my lovely angels Ekam, Kashvi and Seerat were enough to make me forget all the sorrows and tensions. Adorable behavior of my younger sister Ms. Priyanka, my sister-in-law Ms. Minakshi and my wife Ms. Renuka, kept me cheerful throughout my research work.

I am indebted to all the unknown and generous truck drivers who gave me lifts for almost three years and helped me reaching the lab and home in time every day. Otherwise it could never be possible to bridge 130 Kms every day when no bus service was available from my home town to the university.

I express deep and sincere thanks to my friends and all other persons whose names do not appear here but rendered their help and cooperation at various stages of this work.

Finally, I am thankful to God for everything He has done and He is doing for me. Nothing is possible without His grace. May He bless everyone!

Sumit Sharma
