ACKNOWLEDGEMENTS

The completion of this dissertation has left me indebted to many. I would like to take this opportunity to express my gratitude for all the help I received.

My gratitude to my supervisor, Prof. Amit Bhaduri, is immense. His continuous inspiration and valuable insights at all the junctures were key to the completion of this work. I am particularly indebted for his extreme patience with which he saw me through various stages of the work. For all errors, however, I alone remain responsible.

I am thankful to Dr. Kausik Chaudhuri for the help extended by him in the econometric analysis carried out in the study. One close friend whom I cannot thank enough is Dr. R. Kavita Rao who not only patiently read each chapter of the study thoroughly but also provided critical suggestions some of which I have tried to incorporate in this work.

A note of thanks to my friends who have been patient and supportive while I completed my thesis, especially Malini, Raghu, Jatin, Mausumi, Seema, Suparna, Rajiv, Bhaskar, Nisha, Niranjan, Saumen, Sugato Dasgupta, and, of course, Hiranya Mukhopadhyay.

No research work could be complete without the support of libraries and their staff. I feel particularly indebted to Mr. Puran, Mr. Dharamvir, and Ms. Manju of the NIPFP Library, Mr. R.M.Chitnis of the ICRIER Library, Ms. Hema Balasubramanium of the World Bank Library, and the staff at the Ratan Tata Library, and the JNU Library.

I would also like to thank Mr. P.S. Rajagopalan, and Mr. Bisht of our Centre for the help and cooperation I received from them at various stages of completion of my Ph.D.

My gratitude to my parents for their constant support and giving me uninterrupted time for my thesis work. I am also thankful to my niece Shivani and nephew Divyanshu who, in their own way, made me feel relaxed in some very tense moments.

For smoothing out the arguments in the study and editing and proofreading of my thesis I am grateful to my former teacher Dr. Yash Pal Chhibber. He initiated me to look at economic issues in alternative ways.
