CONTENTS

Acknowledgements

1. The Study: Objectives, Scope, and Organization 1
   1.1 The theoretical context and scope of the Study
   1.2 Organization of the study

2. Agricultural Income, Output, and Prices: The Indian Case 9
   2.1 Introduction
   2.2 The evolution of agricultural sector: an overview
   2.3 The Indian case
   2.4 Dominant characteristics of phases of development and government policies
   2.5 Relationship between agricultural income, output, and prices in India: an empirical analysis
   2.5 Summary of findings
      Endnote 2.1

3. Distribution of Agricultural Income and Its Implications for Industrial Sector 45
   3.1 Introduction
   3.2 Distribution of rural resources
      3.2.1 The rural asset distribution
      3.2.2 Distribution of gains from green revolution
   3.3 The empirical evidence and its implications
   3.4 Summary of findings

4. The Process of Interaction between Industry and Agriculture in India 60
   4.1 Introduction
   4.2 Industrial output growth, price, and wages
   4.3 Agriculture-industry interaction
   4.4 Hypothesis on agriculture-industry interactions: the empirical results and their implications
   4.5 Summary of empirical results
      Endnote 4.1

5. Beyond Agriculture: Extensions of Dual Economy Framework 89
   5.1 Introduction
   5.2 The literature on industrial growth
   5.3 The empirical evidence
   5.4 The concluding observations
      Endnote 5.1
