ACKNOWLEDGEMENTS

Be a Bow and See I am the Arrow

...Bhagawad Gita

At this point of time, I am feeling extremely grateful to “GOD” whose blessings made this dream come true. I would also like to thank everyone, teachers, friends, colleagues and family for their kind help, encouragement and understanding to keep me on track during my Ph.D. At the end of thesis, I take this opportunity to express my sincere thanks to all those who contributed in many ways to complete this piece of work and an unforgettable experience for me.

First and foremost, I express my sincere gratitude and thanks to my teacher, advisor and enthusiastic supervisor, Prof. A.J.S. Bhanwer, for giving me this very precious opportunity to study, to learn and improve my scientific knowledge. I am very grateful to him for his guidance, motivation, patience, enthusiasm, suggestions from time to time and immense knowledge in the field of Human Genetics, which make him a great mentor. I am grateful to him for the confidence, he inculcated in me and for believing in me, so that I could fruitfully complete my research work.

I gratefully acknowledge the Guru Nanak Dev University, University Grants Commission (UGC), University with Potential of Excellence (UPE) and Indian Council of Medical Research (ICMR), for the financial assistance they provided to me through the Junior and Senior Research Fellowship.

I express my deep sense of respect and gratitude to my teachers who taught me, always advised and encouraged me. My heartfelt thanks to all the faculty members Dr. Sharda Sidhu, Dr. Gursatej Gandhi, Dr. Badaruddoza, Dr. Vanita Kumar, Dr. Anupam Kaur, Dr. Kamlesh Guleria, Dr. Manpreet and Dr. Sanjana Mehrotra for their valuable guidance and support. I would also like to specially thank Dr. Kawaljit Matharoo, for their valuable timely suggestions, critical evaluation and encouragement through the course of my study. I would also like to extend my thanks to office staff members at Department of Human Genetics, Guru Nanak Dev University Amritsar, especially Mr. Kewal Krishan, for his cooperation in official work.

I duly acknowledge Dr. Rohit Kapoor, for providing the blood samples. I am indebted to all the subjects included in the study as without their cooperation my research work would not have been possible.
I am extremely gratified to my colleagues, Priyanka Raina, Ruhi Sikka, Ramandeep Kaur, Jasmine Sokhi, Harkirat Singh Sandhu, Gagandeep Singh, Savjot Kaur and Gurvinder Singh, with whom I have shared each and every moment of this journey. A friendly environment is always a boost in the research and they have always provided best possible help in execution of experimental and statistical work. I am thankful to them for healthy and scientific discussions, helping me in sample collection, which could not have been possible without their support. I am lucky to have friends like Jasmine Naru and Manveen Arora who have always supported me during personal and professional ups and downs in life. Words are not enough to express my thanks to my best friend Ravi Prakash Bhatia, who was ready to extend timely valuable suggestions and for constantly reminding me of completing thesis and providing his whole hearted support.

The completion of Ph.D. thesis is a long journey. Time neither stands nor waits until you have finished and managed it. My family deserves special mention. Words are insufficient to express the depth of my love, gratitude and respect to my beloved grandmother, my parents Mr. Kul Bhushan Sharma and Mrs. Monika Sharma who instilled within me a love for science, confidence, with belief to excel in my work and motivates me to work harder and who displayed enormous love and care. I feel highly pleased to acknowledge the love and fight of my brother Mayank. Their love, sacrifice, good wishes and encouragement were undeniably the bedrock upon which the years of my life have been built. I give my deep sense of respect to my late grandmother-in-law, parents-in-law Mr. Surjit Indoriya and Mrs. Sunanda Indoriya, my sister-in-law Shikha and brother-in-law Sahil Kumar for their love, understanding and enabling me to concentrate on my research after marriage.

Special thanks to Sandeep, my husband and best friend for his unconditional love and patience to fulfill this endeavor. He has been the pillar of continual support, appreciativeness and encouragement for me in the rollercoaster journey of life.

Rubina Sharma
