ACKNOWLEDGEMENTS

Words fail to adequately convey my profound sense of respect and regards to Prof. Prasanna Mohanty, the beacon of my research career. His excellent advise and original thinking combined with fatherly affection and care have seen me through these years of research, culminating in this thesis. He shall always be a source of encouragement and support to me in all my scientific endeavours. I take this opportunity to express my heartfelt gratitude to him. Persistent inquisitiveness and unrelenting mind of my dear friend and colleague Dr. Basant K. Behera, M.D. University, Rohtak, has given me moral courage at many a difficult times for which I remain always grateful to him.

Thought provoking discussions and profound wisdom of Prof. Govindjee, University of Illinois, USA, have helped in shaping this work enormously. I sincerely thank him for his valuable help. My thanks are also due to Prof. Steven C. Huber, North Carolina State University, USA. Prof. James Barber, ARC Photosynthesis Research Unit, Imperial College, London and Dr. John Whitmarsh, University of Illinois, USA, for their critical comments and useful suggestions during the course of this work. My special thanks are due to Prof. A. Gnanam, Vice Chancellor, Bharati-vasan University, Thiruchirappalli, for his kindness towards me.

I am extremely grateful to Prof. G.S. Singhal, Dean, School of Life Sciences, Prof. P.C. Kesavan, and Prof. Asis Datta, former Deans of the School for all the facilities provided during the course of this work. I
also thank Prof. Sivatosh Mookerjee and Prof. Sudhir K. Sopory for their encouragements.

I am indebted to my laboratory colleagues Drs. R.A. Wavare, A. Grover, S.C. Sabat, Narendra Mohanty, S.D.S. Murthy, Surabhi and Mrs. Chinthamani for their warm and stimulating company in academic ventures and otherwise.

It is a difficult task to name all those who have been good to me and helped me in the difficult times. My sincere thanks are due to all of them. However, special mention must be made of my friends Jai Parkash, Arun, Nehal, Sudhakar, Sridevi, Venu 2, Prashant, Jayaraman, Nishi, Natarajan, Sumathi, Lu, Rina, Ranjana, Saxena, Pawan, Ashok and Venkateswaran who have often rescued me from the clutches of monotony and provided colourful moments to rejoice for ever. Very special thanks are due to my dearest friend Shankaranarayanan for all he has done to me.

Excellent typing by S. Easwar and professional art work by R.N. Saini are gratefully acknowledged. I also thank Chandan Singh Patwal for his sincere assistant-ship in the laboratory.

The love and affection of my brothers and sister, brother-in-law, uncle and grand mother have always kept me in high spirits. I shall always remain indebted to them for everything they have done to me.

I gratefully acknowledge the University and Council of Scientific and Industrial Research for financial support in the form of JRF and SRF. Extensive material support received from the ICAR-USDA project (IN-SEA-170) is also gratefully acknowledged.
