Acknowledgement

I take this cherished opportunity to thank Dr. Uttam K. Pati under whose guidance I was able to complete my project. Dr. Pati's constant observation of my progress and patient guidance enabled me to reach this moment of successful completion of PhD. Dr. Pati's keen interest in my project gave me encouragement to handle difficult problems. I found him always willing to teach whenever I needed his help and thus never let me feel that I did not have any seniors in the lab. Dr. Pati's keen interest in improving the laboratory infrastructure constantly provided us excellent experimental facilities. His moral encouragement helped me overcome ups and downs during my PhD. I have learned a lot while working with him in six-long years. I am also grateful to him for the freedom that he granted me in my work on many occasions in the later phase of PhD, infusing self-confidence in me.

I am also thankful to the faculty of Centre for Biotechnology for the constant encouragement, academic counselling and intellectual and material help that I have received from them.

I would like to thank Dr. Totey for allowing me to use cell culture facility in his laboratory. Dr. Subbarao introduced me to computer and its application in biology which proved to be a precious asset throughout the PhD and will always be helpful in the future.

Nirupama was the only person senior to me in the lab and caused a lot of relief from the responsibility of being the senior-most with her kind-hearted nature and smiling face.

Saurabh joined the lab with me and has been the longest companion in PhD and this companionship developed into a very good friendship. Apart from being great help in routine lab work, he's been great fun to be with. I am also thankful to all the (in past as well as in present) labmates including MSc and summer-training students for providing me a very conducive environment in the lab. Shilpa, Ritu, Nidhi and Chetna helped me to begin with my experimental work. Kunjuman, Saroj, Dipayan, Sujanita,
Rohit, Rouff, Pratibha and Javaid are not around to share the moment of accomplishment but their ever-willingness to help cannot be forgotten.

Special thanks are due to Sarita, Vandana, Prerna, Jai and Mahboob for their timely help and support. I'm also thankful to my labmates Hossein, Amzad, Veenu, Ruchi, Gagan and Jyoti. Jayita's help in editing thesis was a great help. Friendly Anil was always ready to extend a helping hand.

Jaiprakash, Tapas, Agam, Partha, Sonia, Asha, Vani, Deotosh, Smriti, Pankaj, Shams, Atul, Shobhita, Sarat and Shailesh were very helpful seniors and made me feel at home when I joined the Centre. It is difficult to find words to thank Jagdish, Gaurav, Sangeeta, Amardeep and Puneet for their help in most critical situations.

I gratefully acknowledge the help and co-operation by Rajesh, Ramanuj, Aparna, Vibha, Mohsin, Ramani, Sujata, Samar, Himanshu, Yogi, Prasanna, Gautam, Aditya, Babita, Mimin, Nidhi, Praveen, Sanjeev, Vikas, Aruna, Bijoy, Azhar, Y. Sangeeta, Alli, Suman, Rajvir, Vibhuti, Meenakshi, Tanuja and Jyotika.

I am also thankful to Naipalji, Madam Sindhu, Umeshji, Ramsukhji, Beeshuda, Yadavji and Samreshji for their full co-operation. I acknowledge the helping attitude and efficient processing of official work by Mr. Tyagi, Mr. Ved Pal, Ms. Geeta and Mr. Prashant Sen.

I deeply appreciate Sainiji's sincere efforts.

I thankfully acknowledge the financial assistance provided by UGC without which it wouldn't be possible for me to do PhD.

I sincerely thank Gunjan, Manisha, Sanjeev and Meenakshi, for without their help PhD would have been a tougher task.

Sudhanshu, Karthik, Vandana and Sunil are some of those great friends who helped me to lay the foundation of my career in the field of Biotechnology. Every phase of my academic life has enriched me with some precious friendships and PhD was no
exception. I want to thank Palash and Sunny for their support and help. Special thanks are due to my friends Vikas and Sumir who were constant source of encouragement and moral support. I must thank my brother Raman for his moral support and also for bearing with my fluctuating temper and odd routine.

I want to express my gratitude to my parents for being an unfathomable source of inspiration and support. It is their life long efforts and perseverance that has resulted in the completion of my PhD.

Vikas Handa
