ACKNOWLEDGEMENT

My vocabulary fails when it comes to express my gratitude to all who helped in building up this thesis to its present status. First of all I feel highly grateful to my guide Dr. S.L. Agarwal, M.S., F.R.C.S., Professor and Head of the department of Surgery. His indespensible necessary assistance and proper guidance were the main sources of inspiration, making the present shape of this work possible.

I feel highly obliged to Dr. R.K. Gupta, M.D., Reader in department of Pathology. He proved to be an important helping hand and under his guidance the infra structure blossomed to existing form.

I am much obliged to Dr. R.P. Srivastava, Reader & Head, Department of Dental Surgery who provided the necessary material which resulted fruitful for the present work.

My respected teachers in the department of Surgery went off of the way and very kindly permitted me to conduct this study on their cases also.

I fail in my duty if I don’t appriciate the kind assistance provided by my colleagues and friends in the department of Surgery and Pathology.
I extend my obligation to valuable support of to Dr. Harendra Kumar and Dr. Sunil Kumar Gupta, who helped in erecting the backbone of this thesis i.e. the photographs.

The tedious task of converting the manuscript into transcripts was done by Sri B.P.Tiwari and whatever is said to praised him, falls insufficient.

Lastly, I feel highly indebted to my parents and wife for their constant moral support.
