ACKNOWLEDGEMENT

It is pleasure to avail this golden opportunity to express my sincere regards and thanks to my esteemed guide Dr. V. K. Misuriya, Associate Professor, Department of Ophthalmology, M.L.B. Medical College, Jhansi for his enlightened guidance which steered me towards the harbour of success. I’m greatly thankful for his mature guidance, invaluable advice and kind supervision without which this work would not have seen the light of day.

No words can express the depth of my sense of gratitude for my revered teacher Dr. B.S. JAIN, Associate Professor & Head, Department of Ophthalmology, M.L.B. Medical College, Jhansi who epitomizes “The true teacher” to perfection. I will always try to emulate his unfazed perseverance in daunting situations, his unflagging zeal for his work and his penchant for anything novel. His unflinching support, constant encouragement and unrestrained accessibility provided the morale needed for undertaking such a project. His positive constructive criticism and fastidious approach provided the benchmarks for self-improvement. I will remain indebted to him for his valuable guidance and gracious direction.

At this juncture of gratitude, I would like to thank my respected Parents and family members who by their boundless cooperation, unconditional and firm support and encouragement, through thick and thin,
have been a constant source of inspiration and have kept me from faltering throughout this endeavour.

I would not be doing justice to my colleagues, juniors and friends especially Dr. Dheeraj Gautam & Dr. Anant Vir Jain, if I failed to mention their invaluable help, without which this work would have been a lot more difficult to complete.

Last but not the least, I thank the subjects of this study without whose cooperation this study could not be accomplished.
