Acknowledgement

It gives me a great pleasure to place on record my deep sense of gratitude to my mentor Dr. Ganesh Pandey for introducing me to this enthrilling field of Organic Photochemistry. The work presented here could not have been accomplished without his patience and ever willingness to teach. I am grateful for his teaching, guidance and friendship. He has taught me to be concise and correct in my approach to science from the formulation of ideas to the presentation of the results.

I take this opportunity to thank Dr. J. P. Mittal, Director, Chemistry Division, Bhabha Atomic Research Centre (BARC) and Dr. D. K. Palit, BARC, for their guidance and help in allowing me to carry out research work on Laser Flash Photolysis studies at BARC. I would also like to thank Dr. H. R. Sonawane, Dr. N. N. Joshi, Dr. S. V. Pansare, for helpful discussions from time to time.

I gratefully acknowledge the guidance and support extended by my senior colleague Dr. B. B. V. Somasekhar during the initial part of research.

Special thanks are due to my senior colleagues and present labmates for their constant encouragement and for maintaining a very friendly atmosphere.

Help from Spectroscopic group is gratefully acknowledged. Special thanks are due to Mr. A. G. Samuel, Mrs. Phalgune and Mr. Sathe.

I would like to specially thank Raghunath, Nagesh, Ramakrishna, Rajasekharam, Akhil, and Trusar for taking trouble in bringing out the thesis. It is a pleasure to acknowledge my friends Ravi, Sochan, Venkat, Jay, Nandan, Sunny, Puyam, Kutty, Pradeep, Sharma, Dekka, Suju, Newman, Vinod and many in NCL who are not named in person for their cheerful company during my stay at NCL. My due regards to Venkatesh, Anand, Krishna, Ramesh babu, Gangamani, Gopal, Pallan and other well wishers.

I thank Dr. K. N. Ganesh, Head, Division of Organic Chemistry (Synthesis) and Director, National Chemical Laboratory, Pune, for providing infrastructural facilities and for permitting me to submit this work in the form of a thesis. I am thankful for the financial assistance from the Department of Atomic Energy (DAE), Mumbai in the form of Dr. K. S. Krishnan fellowship.

Last but not the least, I take this opportunity to thank my parents, brothers and sisters-in-law without whose support, encouragement and help in all respects, this work would not have come to fruition. They have been a constant source of strength and have brought a great deal of happiness in my life.
