CHAPTER I: INTRODUCTION

1.1. FORMATION OF UREA

1.2. CLINICAL SIGNIFICANCE OF UREA

1.3. DETERMINATION OF UREA LEVELS IN BODY FLUIDS

1.4. NATURE AND SCOPE OF PRESENT DISSERTATION

References

CHAPTER II: EXTRACTION AND PARTIAL PURIFICATION OF UREASE FROM DOLICHOS BIFLORUS

2.1. INTRODUCTION

A. Ureases: General outline
B. Plant ureases

2.2. EXPERIMENTAL ASPECTS

A. Materials and methods
B. Solutions and reagents
C. Extraction of Urease
D. Purification of urease
E. Physicochemical characterization of the enzyme.

2.3. RESULTS AND DISCUSSION

A. A. Enzyme extraction
B. Screening of different plant seeds for urease activity
C. Purification of enzyme
D. Physicochemical characterization

2.4. CONCLUSIONS

References
CHAPTER III: IMMOBILIZATION OF UREASE IN DIFFERENT POLYMERIC MATRICES

PART I: 52 – 95

3.1. INTRODUCTION

A. Immobilization technique
B. Supports for immobilization
C. Immobilization of urease for the fabrication of biosensors
D. Present work

3.2. EXPERIMENTAL

A. Materials
B. Methods
C. Characterization of immobilized enzyme membranes

3.3. RESULTS AND DISCUSSION

A. Immobilization of urease in biopolymeric matrices
B. Entrapment of urease in composite biopolymeric matrices
C. Characterization of immobilized enzyme films
D. Performance of immobilised enzyme systems

3.4. CONCLUSIONS

PART II: POROUS SILICON AS AN ENTRAPPING MATRIX FOR THE IMMOBILIZATION OF UREASE 96-117

3.5. INTRODUCTION

3.6. EXPERIMENTAL

3.7. RESULTS AND DISCUSSION

3.8. CONCLUSIONS

References
CHAPTER IV: DEVELOPMENT OF UREA BIOSENSORS BASED ON IMMOBILISED UREASE SYSTEMS AND THEIR APPLICATIONS

4.1. INTRODUCTION

A. Biosensor concept
B. Definition of biosensor
C. Evolution of biosensors
D. Components of biosensor
E. Enzyme based biosensors
F. Literature review on urea biosensor

PART I: DEVELOPMENT OF POTENTIOMETRIC BIOSENSOR BASED ON UREASE IMMOBILIZED ON GELATIN AND CHITOSAN MEMBRANES

4.2. INTRODUCTION

4.3. EXPERIMENTAL

4.4. RESULTS AND DISCUSSION

4.5. CONCLUSIONS

PART II: FABRICATION OF OPTIC FIBRE UREA BIOSENSOR USING UREASE ENTRAPPED BIOPOLYMERIC MEMBRANES

4.6. INTRODUCTION

4.7. EXPERIMENTAL

4.8. RESULTS AND DISCUSSION

4.9. CONCLUSIONS

4.10. OVERALL CONCLUSIONS
