Acknowledgement

It is a pleasure to avail this golden opportunity to express my sincere regards and thanks to my esteemed guide and revered teacher Dr. B.S. Jain MS, Head, Department of Ophthalmology, MLB Medical College, Jhansi. Although no words can express the depth of my sense of gratitude, his firm support, constant encouragement & unrestrained accessibility provided the morale needed for undertaking such a project. I will always try to follow his punctuality, meticulous attention to details, methodical approach and his unflagging zeal for his work. He is always receptive to new ideas and it was on his valuable initiation and advice that I commenced this study. I will always remain indebted to him for his ingenious guidance and gracious direction.

I am also indebted to Dr. V.K. Misurya, Associate Professor, Department Of Ophthalmology, for his precious guidance, expert advice and kind supervision which encouraged me in the completion of this work.

I am also very grateful to Dr. R.K. Agarwal MD, Head, Department of Microbiology, for his invaluable guidance and stimulating
exchange of ideas, especially regarding the preparation and preservation of amniotic membrane.

I am immensely thankful to my respected parents, my brother Vipul, sister-in-law Abha, my fiancée Dr. Ashutosh and my in-laws for their numerous sacrifices, boundless co-operation, constant support and inspiration, which have kept me from faltering throughout this endeavor.

I also extend my sincere thanks to my seniors, colleagues, friends and juniors especially, Dr. Anant, Dr. Charu, Dr. Deepali, Dr. Mamta, Dr. Iademhal and Dr. Niti for their invaluable help without which this work would have been a lot more difficult to complete. Last but not the least, I thank the subjects of this study without whose co-operation and patience this study could not have been accomplished.

For designing of this manuscript, I am thankful to Mr. Vinod Raikwar (V.K. Graphics).

Dated: 23/01/2004
