ACKNOWLEDGEMENT

To attempt to confine the greatness of my dynamic, academic and most respected hono'rable teacher Dr. Dinesh Pratap, M.S., within the words would be impossible on my part. Inspite of his burden of departmental work and his tight engagements, he has always given me the opportunity of his invaluable help and constant guidance without which this presentation would not have materialised. His sweet scoldings in between have always been a source of encouragement to me. I express my deepest sense of gratitude to him.

I falter in my choice of words when I try to express my gratitude for my kind and extremely helpful teacher Dr. (Mrs.) Ratna Saxena, M.D. who always sat with me to critically analyse my findings and observations, the help that she has given to me, I shall be absolutely unable to repay back in my life.

I would not be justifying in my duties if I do not express my thanks to all my friends, patients for the help that they provided me.

I thank for Mr. Badri Prasad Tiwari for excellent typing.
