**List of Figures**

1. A MAP VIEW OF AEROBIOLOGICAL RESEARCH CENTRES IN INDIA

2. A MAP VIEW OF MAHARASHTRAS STATE IN INDIA

3. A MAP VIEW OF BEED DISTRICT (RESEARCH AREA)

4. Figure A-4: The percentage contribution of each fungal groups and other types in I and II kharif season over Bajara field

5. Figure A-5 Line graph showing monthly variation in the total concentration of Airstora with meteorological parameter during kharif (I and II season over Bajara Field)

6. Figure A-5 Line graph showing monthly variation in the total concentration of Airstora with meteorological parameter during kharif (I and II season over Bajara Field)

7. Figure A-6: Histograms reveals the monthly variation in the concentration of each spore type during first and II kharif season over Bajara field

8. Figure A-7: Histograms reveals the monthly variation in the concentration of each spore type during first and II kharif season over Bajara field

9. Figure A-8: Histograms reveals the monthly variation in the concentration of each spore type during first and II kharif season over Bajara field

10. Figure A-9: Histograms reveals the monthly variation in the concentration of each spore type during first and II kharif season over Bajara field

11. Figure A-10: Histograms reveals the monthly variation in the concentration of each spore type during first and II kharif season over Bajara field

12. Figure A-11: Histograms reveals the monthly variation in the concentration of each spore type during first and II kharif season over Bajara field

13. Figure B-1: The percentage contribution of each fungal groups and other types
during morning and evening in vegetable market

14. Fig B-2 : Line graph showing monthly variation in the total concentration of Airspora with meteorological parameter during the year 2012 in the vegetable market

15. Fig B-2 : Line graph showing monthly variation in the total concentration of Airspora with meteorological parameter during the year 2012 in the vegetable market
