

LIST OF TABLES

Table Number	Description	Page Number
2.1	Comparison of PSNR,s with traditional SOFM based VQ and Evolutionary sorting method	18
2.2	Summary of the results obtained by surveying different Vector quantizers.	27
4.1	Results of Codebook trained with Lena Image of 128 x 128 sizes and testing on 128x128 size (8 bpp) gray images. (Codebook size 1K)	58
4.2	Results of Codebook trained with Lena Image of 256 x 256 sizes and testing on 256 x 256size (8 bpp) gray images.(Codebook size 1K)	59
4.3	Results of Codebook trained with training Image of 256 x 256 sizes (as shown in fig.4.4) and testing on 256 x 256size (8 bpp) gray images.(Codebook size 1K).	64
4.4	Samples of original blocks and corresponding trained codevectors in enhanced codebook trained with 256x256 image.	67
4.5	Number of blocks of different images with selection criteria's used in design of generic codebook.	72
4.6	Performance analysis of generic codebook (1K) using quality measures for gray scale images of 256x256 sizes.	73
4.7	Performance analysis of generic codebook (1K) with error using quality measures for gray scale images of 256x256 sizes.	74
4.8	Performance analysis of backpropagation applied to images compressed with generic vector quantizer.	76
4.9	Performance analysis of backpropagation applied to images compressed with generic with error vector quantizer.	76
4.10	Results for medical images with enhanced vector quantizer of 1K sizes. Images used for testing are of 256x256 pixel	78

	size.(8 bpp)	
4.11	Textural analysis parameters comparison for medical images compressed using enhanced VQ. Image size 256x256 pixels.	78
4.12	Textural analysis parameters comparison for medical images compressed using Generic with error VQ along with back propagation. Image size 256x256 pixels.	81
5.1	Quality analysis of codebook (1Kx3 size) designed using training of SOFM by color Lena image and testing with 256x256 images.	101
5.2	Quality analysis of Enhanced codebook (1Kx3 size)and testing with 256x256 images.	102
5.3	The images and number of samples selected from images for training of SOFM in codebook design over RGB plane.	104
5.4	Enhanced VQ designed using HSI color space .VQ size 1Kx3 and testing is done on 256x256 color images	110
5.5	Generic VQ with error designed using HSI color space. VQ size 1Kx3 and testing is done on 256x256 color images.	111
5.6	Quality analysis of the Generic with error (Generic 2) VQ designed using YIQ color space.	113
