

List of Photographs

- Photo 1. Habitat: *Puria dorsalis* and *Hinzuanius indicus* (Locality: Lohgarh, Western Ghats)
- Photo 2. Habitat: *Buldhania dharurensis* (Locality: Srigonda, Deccan Plateau)
- Photo 3: Live specimens of *Hinzuanius indicus* clings to the under surface rocks. While walking the long second legs stretched forward as a sensory organ.
- Photo 4: Live specimens of *Puria bastawadeii*. While walking the long second legs stretched forward as a sensory organ.
- Photo 5.: *Gnomulus aborensis* (Roewer, 1913) Juvenile, Dorsal view
- Photo 6. *Gnomulus aborensis* (Roewer, 1913) Juvenile, (ventral view)
- Photo 7. *Ghatgharius roewerii* sp. nov. Dorsal view
- Photo 8. *Ghatgharius roewerii* sp. nov., enlarged anterior portion (Dorsal view)
- Photo 9. *Ghatgharius roewerii* sp. nov. (lateral view)
- Photo 10. *Ghatgharius roewerii* sp. nov. (ventral view)
- Photo 11. *Ghatgharius roewerii* sp. nov. distitarsus of leg IV, showing pseudonychium (arrow marked).
- Photo 12. *Nothippus andamanensis* sp. nov. (Dorsal View)
- Photo 13. *N. andamanensis* (Ventral view) Photo 14. Stigma (*N. andamanensis*) shown by arrow
- Photo 15. *N. andamanensis* (lateral view)
- Photo 16: *Buldhania lonarii* ♀ (Dorsal view)
- Photo 17. *Buldhania lonarii* ♀ (Dorsal view): Anterior region of carapace; Arrow showing anterior protruding structure
- Photo 18: *Buldhania lonarii* ♀ (Ventral view)
- Photo 19: *Buldhania lonarii* ♀ (Ventral view): Anterior region (enlarged) showing mouth parts.
- Photo 20: *Assaphala indicus* ♂ (Dorsal view); arrow showing single tubercle on the dorsolateral surface of 4th coxa
- Photo 21: *Assaphala indicus* ♂ (Dorsal view)
- Photo 22: *Puria dorsalis* ♂ (Dorsal view): Arrow pointing to larger coxal spines on dorso lateral surface of 4th coxa
- Photo 23: *Puria dorsalis* ♀ (Dorsal view)
- Photo 24: *P. dorsalis* ♂ (Ventral view)
- Photo 25: *Puria dorsalis* ♂ (Ventral view): enlarged view of showing stigma
- Photo 26: *Puria bastawadii* ♂ (Dorsal view): Arrow pointing to small tubercular spines on the dorso-lateral surface of fourth coxa
- Photo 27: *Puria bastawadii* ♂ (Ventral view)
- Photo 28: *Metassamiia soerensenii* ♂ (Dorsal view)
- Photo 29: *Metassamiia soerensenii* ♂ (Ventral view)
- Photo 30: *Metassamiia soerensenii* ♂ (Lateral view)
- Photo 31: *Aboriscus aborensis* ♂ (Dorsal view)
- Photo 32: *Aboriscus aborensis* ♂ (Ventral view)
- Photo 33: *A. aborensis* ♂ (Lateral view); Arrows showing the large spines
- Photo 34: *Aboriscus aborensis* ♀ (Dorsal view)
- Photo 35: Tarsus of leg I of *A. aborensis* ♂ showing the swollen digits of besitarsus

- Photo 36: *Neobunus arunanchalicus* ♂ (Dorsal view): Arrow showing the elongated palpal apophysis on tibia
- Photo 37: *Neobunus arunanchalicus* ♂ (Lateral view)
- Photo 38: *Neobunus arunanchalicus* ♂ (Ventral view)
- Photo 39: *Neobunus arunanchalicus* ♀ (Dorsal view)
- Photo 40: *Neobunus arunanchalicus* ♀ (Ventral view)
- Photo 41: *Scabrobunus utkalensis* (Dorsal view)
- Photo 42: *Scabrobunus utkalensis* (Ventral view)
- Photo 43: *Scabrobunus utkalensis* (Lateral view)
- Photo 44: *Roeweria martensii* (Dorsal view)
- Photo 45: *Roeweria martensii* (Ventral view)
- Photo 46: *Neoscabrobunus dharurensis* ♂ (Dorsal view)
- Photo 47: *Neoscabrobunus dharurensis* ♂ (Ventral view)
- Photo 48: *Dhenkanala tikaderii* (Dorsal view)
- Photo 49: *Dhenkanala tikaderii* (Ventral view)
- Photo 50: *Phalcochina albistriata* ♀ (Dorsal View)
- Photo 51: *Phalcochina albistriata* ♀ (Dorsal View): Enlarged posterior region showing spines.
- Photo 52: *P. albistriata* ♀ (Ventral View)
- Photo 53: *Phalcochina albistriata* ♀ (Lateral View)
- Photo 54: *Panchganius blatterii* ♂ (Dorsal view)
- Photo 55: *Panchganius blatterii* ♂ (Dorsal view of posterior region), Arrows showing the prominent pair of tubercles.
- Photo 56: *Panchganius blatterii* ♂ (Ventral view)
- Photo 57: *Panchganius blatterii* ♂ (Lateral view)
- Photo 58: *Mormuga uncifrons* ♂ (Dorsal view)
- Photo 59: *Mormuga uncifrons* ♂ (Dorsal view): showing the dorsal spines of scutum.
- Photo 60: *Mormuga uncifrons* ♂ (Lateral view)
- Photo 61: *Mormuga uncifrons* ♂ (Ventral view)
- Photo 62: *M. uncifrons* ♂ (Ventral view): enlarged to show the stigma
- Photo 63: *Biantes astroluteus* ♂ (Dorsal view)
- Photo 64: *Biantes ganjamensis* ♂ (dorsal View)
- Photo 65: *Biantes ganjamensis* ♂ (ventral view)
- Photo 66: *Biantes ganjamensis* ♂ (Lateral view)
- Photo 67: *Biantes tuberculatus* ♂ (Dorsal view)
- Photo 68: *Biantes tuberculatus* ♂ (Ventral view)
- Photo 69: *Hinzuanus indicus* (Dorsal view)
- Photo 70: *Hinzuanus indicus* (Ventral view)
- Photo 71: *Hinzuanus indicus* (Lateral view) (From Sindhudurg)
- Photo 72: *Hinzuanus indicus* (Lateral view) (From Lohgarh, Pune)
- Photo 73: *Hinzuanus khandagiri* ♂ (Dorsal view)
- Photo 74: *Hinzuanus khandagiri* ♂ (Dorsal view): Enlarged scutal region showing spines arrangements
- Photo 75: *Hinzuanus khandagiri* ♂ (Ventral view)
- Photo 76: *Hinzuanus khandagiri* ♂ (Ventral view): Mouth parts and Chelecerae
