ACKNOWLEDGEMENTS

These are expressions of warm gratitude that will ache in me until it is expressed:

I record herewith, my teacher-guide Dr. V. G. Rao, Reader in Mycology & Plant Pathology, with deep sentiments of respects and gratitude in permanence, for his valuable guidance and sincerity throughout the tenure of this Research Work. With limited time available and allotted, I could derive the best of fruits, due between of any true teacher-student-thood.

I have hearty sentiments of reverence and gratitude to Professor Emeritus M. N. Kamat, Head of the Department for unfailing interests, encouragements besides for the confidence he showed in me with due appreciation, on the attempts I have been carrying out for he believes and himself said that "nothing is absolute (excluding GOD); everything is relative".

With both as above, I could ever well maintain myself, both at heart and spirit in steadfast lines of discipline and interest. It was a tradition followed.

Professor G. B. Deodikar, Director, M.A.C.S. Research Institute, Poona 4 extended excellent technical and administrative facilities, conducive to the progress of the work assigned to me. I record here my gratitude and respects to the Director.

I thank sincerely all colleagues of my teacher and particularly Dr. L. Moniz, Hon. Professor of Microbiology; Dr. P. G.
Patwardhan and Dr. A. V. Sathe of this Department, for their friendliness, discussions and useful criticisms.

I am especially grateful to Dr. (Mrs.) Alaka Pande, Curator, Ajrekar Mycological Herbarium for the ungrudging help and cooperation she rendered.

Overseas, Professor Emeritus Emil F. Guba, Professor of Botany, Massachusetts Institute of Technology (Retd.) from Boston rendered invaluable help towards establishing the specific identity of Pestalotia studied. I record herewith my best sentiments of gratitude. Besides, Dr. J. A. von Arx, Director, C. B. S., Baarn, The Netherlands and also Dr. M. B. Ellis, Dr. C. Booth, Dr. D. L. Hawksworth, Dr. A. Sivanesan of C.M.I., Kew, England who responded to help me in establishing identity of certain difficult fungal genera.

I wish to put on record my gratefulness and appreciation for the valuable help received from Dr. P. A. Limaye, Mr. S. B. Bhosale and Mr. B. Ramesh (of Department of Chemistry) and apart of Mr. S. B. Thakur, Ruparel College, Bombay 16.

At this Department, I had their kind assistance and help received from Mr. A. V. Vadhawkar and many others. I am grateful to Mr. K. I. Mani Varghese and Mr. C. R. Kulkarni for their helping hands for completing the thesis in the final form.

And, among my colleagues recently passed out from this Dept., I had associated and received sincere help from Mr. A. S. Patil,
Mr. R. R. Mallikarjunaiah, Dr. D. N. Mhaskar, and Dr. D. V. Narendra and I thank them in all sincerity.

Mr. S. K. Vaidya, Librarian, M.A.C.S. Library, Poona 4, ever availed even himself to me, besides his skilled staff, keeping me assisted with the ocean of literature for which I thank him and his staff.

Research expenses could be kept at ease, due mainly to the award of a Research Fellowship. I thank sincerely the authorities of the Ministry of Education, Govt. of India for this consideration.

At home, but for the moral support and sincerity, together with many a assistance further in finance from my brother Mr. T. V. Ramakrishnan, Department of Civil Engineering, Indian Institute of Technology, Bombay, this "dream would not have come true". I record my gratitudes and faithfulness to him and Mrs. Pushpa Ramakrishnan.

Never in the least, neither the last, I ought to appreciate and thank Mr. S. D. Belsare for his fast fingers over the machine, typed out in agility.

Department of Mycology and Plant Pathology, M.A.C.S. Research Institute, Poona 411 004.

5th May 1976.

(V. Subramoniam)
