PREFACE ... ... i - ii
ACKNOWLEDGEMENTS ... ... iii - v

PART I. POST-HARVEST DISEASES OF FRUITS AND VEGETABLES IN MAHARASHTRA

Introduction ... ... 001
Review of Literature ... ... 002
Storage Pathology in Maharashtra State 004
Materials and Methods ... ... 05 - 6

Section A : Prevailing Diseases ... ... 07-55

Section B : New or Noteworthy Diseases 056-79

Cultural Characters of Certain Storage-Pathogens ... ... 080-87

Chapter I : Observations on Markets & Marketing Hygiene in Maharashtra 088-95

Chapter II: Discussion and Summary 096-104

Section C : Pathological and Physiological Studies into four fungi inciting Storage Diseases of Cucumber, Muskmelon, Sweet-potato and Tinda

Chapter I : Symptomatology, Pathogenicity, Host Range and Identity (105-128)

Myrothecium rot of Cucumis sativus 105-107
Thielaviopsis rot of Cucumis melo 107-108
Pellionella - Scurff- disease of Sweet-Potato 108-113
Pestalotia rot of Tinda 113-116
Chapter II: Studies into Cultural behaviour and conidial germination of the four Storage-Fungi ... 129-146

Chapter III: Effect of Physical Factors on the growth and reproduction of the four Storage-Fungi ... 147-171

Chapter IV: Nutritional Studies into four fungi causing Storage-Diseases of Cucumbers, Muskmelons, Sweet-potato and Tinda ... 172-207

Bibliography ... 208-231-

Section D: Comparative Studies into four isolates of Thielaviopsis paradoxa inciting storage-rots of Ananas, Muskmelons, Pear and Wood-apple 232-247

Bibliography ... 248

Section E: "In Vitro" studies on the efficacy of Thiophamine (a systemic fungicide) against some storage-pathogens 249-254

Bibliography ... 255-257

Summary & Conclusions of Part I ... 258-263

PART II: TAXONOMY OF SOME INDIAN ASCOMYCETES AND FUNGI-IMPERFECTI

Introduction ... 264-267

Section A: Ascomycetes ... 268-289

Section B: Fungi-Imperfecti ... 290-315

Summary of Part II ... 316-318

Bibliography ... 319-328

RESEARCH PUBLICATIONS ... 329-330
