ACKNOWLEDGEMENTS

I deem it a privilege to express my deep sense of gratitude to my Supervisor Prof. Santosh Kar, for the able guidance and meticulous supervision. I am thankful to him for introducing me to the fascinating world of cytokines and arousing the curiosity to learn more. I am especially grateful to him for his interest and support in successful completion of my time-bound research project, in record time. During my last 3 years interaction, I have seen him as a creative person, full of innovative ideas & always restless to implement them. I wish we are long-term research collaborators and wish the end of my Ph.D. program marked the beginning of our research collaboration.

The highly timed meeting with Dr. RK. Chatterjee, Ex-Head; Division of, Parasitology, CDRI, Lucknow, and Dr. Shailja Bhattacharya, Scientist E-II, Division of Parasitology CDRI, Lucknow could help me to solve one of the biggest problems, that is the parasite material. Dr. Bhattacharya was always ready to help. I am grateful to her.

I am thankful to the Chairman and Faculty of Center for Biotechnology, Jawaharlal Nehru University for their constructive criticism and help.

I am grateful to Dr. M. Sinha, Director, CIFRI, Barrackpore, West Bengal, and the Indian Council of Agricultural Research (ICAR) for granting me Study Leave to pursue the Doctoral studies.

Sarat, Dr. Sarat Dalai, NIAID, NIB, USA and Subhendu, Dr. Subhendu Das, Texas, USA were great friends. I am grateful to Sarat for helping me learn the various experimental techniques in this lab. Subhendu was a nice company. I miss them a lot.

I am highly indebted to the people of district of Khurda, Orissa for their cooperation and whole-hearted support, which enabled me to successfully complete such a high/y field-oriented project. Special thanks to Chitrasen, Godavarish, Chandrasekhar, Nityanada, and Sumi, Mini, Kaji, Budhia, Biju, Ami, Sudhansu and Sudhir for their generous help in the field work.
I am thankful to my father-in-law Dr. P. K. R. Mohapatra, MS, DGO and his friends Dr. B. M. Khadanga, MS, Dr. D. C. Nayak, MD, Dr. A. K. Dalai MD and Muna (Biswaranjan), D. Pharm, for volunteering their time to organise Health Camp, for the benefit of the people of my study area.

My lab colleagues Ramanuj, Suchitra, Shobhita, Sanjeev, Suman, Himansu, Rajbir, Jyotika, Bibhuti, Vikas, Nrusingh, and Hassan were great company in the lab. They were always ready to extend their helping hand; whenever needed. I will remember them always. Thanks to Mukesh, Ramsukh, and Raju for their help in the lab.

Role of Dr. Subash Parija, Asst. Professor (Pharmacology), OUAT needs special mention. Whatever may be the place, may be the Biju Patnaik Airport to send the samples for culture, the rural study area for night blood survey or his lab for processing the samples, Parija Saab is ever ready to make all out effort to make the mission successful. It needs to have great friends like Subash to make tough jobs simple.

I am very much thankful to Drs. A. K. Kundu, K. K. Sardar, P. C. Behera, Asst. Professor/s and Dr. P. C. Bisoi, Associate Professor, OUAT, Bhubaneswar for their help during my field trips. I am thankful of to my grandfather-in-law Sjt. Rabi Ray, Ex-Speaker Lok Sabha for the moral support and encouragement The encouraging words of Prof. P. K. J. Mohapatra, IIT, Kharagpur, Prof. Karmeshu, SCSS, JNU, Prof. Prasanna Mohanty and Prof. B. C. Tripathy, SLS, JNU will always be remembered.

I am obliged to my uncle Dr. Gopinath Parida, Ph. D., Retd. Director, Horticulture, Government of Orissa for his critical advice that made my field works a success.

I will always cherish the nice company of Varsha, Suchi, Preeti, Deepali, Lata, Anasuiya, Sanjay, Gopal, Harish, Yash, Biswaranjan, Akhilesh, and Ajay who made my tough moments at JNU lighter. I thank my colleagues Drs. Samanta, Manna, Hassan, Biren, Dr. Bandhopadhyay, and other Scientist colleagues at CIFRI; Barrackpore for their good will and help.
I must mention the uninterrupted services rendered by my faithful friend, my KB 4S- OR 02B 1930, for the innumerable shuttles between JNU and my residence.

I am very much thankful to Mr. Saini, Technical Officer, SLS, JNU for the excellent photography and kind help at odd hours.

I must mention the names of the human volunteers from the endemic area who are presently in JNU; to name a few Bibhuti, Gopal, Manoranjan, Nihar, who readily agreed to donate blood for many of the standardisation works.

There goes the adage 'Charity begins at home'. II is the members of ones family and extended family who contribute greatly and provide the right environment for ones mental growth. I cannot repay the debt of my parents, brother, sister-in-Iaw, sisters and brothers-in-Iaw, niece and nephews for their love & support. The timely presence of my younger brother Mitu (Deva Narayan) during my thesis writing has been very useful. He carried the sera samples from the study area to New Delhi with great care.

My parents-in-Iaw have been exceptionally supportive. I am thankful to my sisters-in-Iaw, Lina & Khira for their love and care. Lina single handedly took the responsibility of my daughter, which helped me to concentrate in my work. I am grateful to them.

My daughter Goody (Dikshya) has been exceptionally adjustable. She has missed the parental care for the cause of my academic growth. I bow my head before the Almighty for this wonderful gift. Mira has been my strength all the time. I doubt, I could have written this page had she not been in JNU during my struggle to get through the Ph.D. program. She stood besides me firmly at all times.

Last, but not the least, LET SCIENCE PROGRESS.

Bimal P. Mohanty
