## List of Figures

1.1 The Lifecycle of Web Service Composition ................................................. 5  
2.1 Service-oriented architecture ................................................................. 12  
2.2 Web services architecture model ............................................................. 13  
2.3 Semantic Web Reference Architecture Version 4 ........................................ 14  
2.4 RESTful Web Services Architecture ......................................................... 24  
2.5 Evolution of the Web (Bauer and Kaltenböck) ........................................... 25  
2.6 An RDF Graph Describing Eric Miller (Manola, Miller, and McBride) ......... 27  
4.1 Proposed framework for Web services discovery, selection and composition ................................................. 60  
4.2 Comparison of Proposed Approach with QoS-based Approach .............................. 70  
4.3 Comparison of Proposed Approach with Hybrid Approach .............................. 71  
4.4 A prototype for Healthcare Information System ........................................... 72  
4.5 A sample of Dentistry Ontology Model ..................................................... 74  
4.6 Composition plan .................................................................................. 75  
4.7 Composition process time ....................................................................... 75  
5.1 RESTful Web Services Discovery, Selection and Composition Framework .... 79  
5.2 Flowchart of Discovery process .................................................................. 83  
5.3 Flowchart of Composition process ............................................................. 87  
5.4 Prototype Framework for US-based Population Information System .............. 88  
5.5 Base URIs of discovered resources ............................................................ 91  
5.6 Population service composition plan .......................................................... 93  
5.7 Visualization of Composition result ............................................................ 93  
5.8 Prototype Framework for Emergency Healthcare Recommendation system .. 95  
5.9 H1N1 Data of No. of cases and Mortality rate 2009-2013 in India ................ 97  
5.10 RDF/XML data .................................................................................. 98  
5.11 Base URIs retrieved through discovery process ........................................... 98  
5.12 RDF representation of symptoms, diseases ............................................... 99  
5.13 work-flow plan for Healthcare Recommendation System .......................... 100  
5.14 RDF graph for Healthcare Recommendation System .................................. 101  
5.15 LOD cloud Model for Healthcare Recommendation System ..................... 102  
5.16 Visualization of recommended composed result .......................................... 102  
5.17 Recommendation Detail ........................................................................ 103
