

**LIST OF TABLES**

Table 1: Variations in nucleotide contents for the genes amplified in the study.

Table 2: Details of RAPD Primers included in the study.

Table 3: List of *Ae. aegypti* populations included in the study as per the geographic location.

Table 4: Details of geographic locations of *Ae. aegypti* mosquito strains collected from field in the current study.

Table 5: Details of cellular isoenzymes studied with their attendant buffer and stains.

Table 6: Allele frequency at each polymorphic locus and chi-square value for the determination of Hardy-Weinberg equilibrium in *Ae. aegypti* populations from India.

Table 7: Genetic variability in *Ae. aegypti* populations from India for five enzymes.

Table 8- Genetic structure analysis of *Ae. aegypti* populations (N=13) from different geographical areas using F statistics.

Table 9: Matrix of genetic distance and similarity among the *Ae. aegypti* populations.

Table 10: Diagnostic dosages (%) and exposure times (h) for adults.

Table 11: Classification of susceptibility status of adult *Ae. aegypti*.

Table 12: Comparative susceptibility of adults of different *Ae. aegypti* populations to diagnostic concentrations of insecticides.

Table 13: Comparative susceptibility of larvae of different *Ae. aegypti* populations to different insecticides.

Table 14: Characteristic of *Ae. aegypti* populations for biochemical assays from India.
