DETAILED CONTENT

ACKNOWLEDGEMENT (i)

SUMMARY OF CONTENTS (iv)

DETAILED CONTENTS (v)

LIST OF TABLES (x)

CHAPTER I: INTRODUCTION 1
1.1 Economic Theory of Fertility 1
1.2 Opportunity cost of a child to an employed mother 6
1.3 Sociological theory of fertility 8
1.4 Socio-economic costs and rewards of children and of women's employment 10
1.5 Women's labour force participation and their fertility: A review of earlier research 14
1.6 Statement of the problem 21
References 22

CHAPTER II: RESEARCH DESIGN 31
2.1 Selection of the sample 31
2.2 Questionnaire formulation 35
2.3 Problems faced in conducting the survey 39
2.4 Limitations of the study 43
2.5 Chapter Scheme 44
References 50

CHAPTER III: PROFILE OF THE RESPONDENTS 51
3.1 General Profile of the respondents 51
3.2 Profile of the respondents by occupation and by occupational level 56

CHAPTER IV: AGE AT MARRIAGE 60
4.1 Age at marriage and Fertility - Earlier Findings 60
4.2 Women's employment & their age at marriage 62
4.3 Analysis of data collected 64
4.3.1 Respondents' perception of the effect of their employment on their age at marriage 65
a. Respondents' perception of the effect of their employment on their relatives' attitude about the respondents' marriage 67
b. Respondents' perception of the effect of their employment on their own attitude about marriage 69
c. Respondent's perception of the total effect of their employment on their age at marriage 72

4.3.2 Occupation wise difference in the age at marriage 74
   a. The mean age at marriage by occupation 75
   b. Cross tabulation of age at marriage by occupation 76

4.3.3 Differences in the age at marriage by occupational level 77
   a. Perceived direct relationship between respondents' employment and their age at marriage cross tabulated by their work category 78
   b. Perception of the total effect of work category on the age at marriage by the occupational level of the respondents 80

4.3.4 Other service related factors affecting the age of marriage 82
   a. Need of service and proportion of respondents' income to family income before marriage 83
   b. Respondents' attitude about service 84

4.3.5 Effect of age at marriage on fertility - The finding of this research 85

References 90

CHAPTER V : ATTITUDE ABOUT FACTORS AFFECTING FERTILITY 92

5.1 General Attitude about factors affecting fertility 92
5.1.1 Summary of the questions on attitude 92
5.1.2 Attitude on marriage and remarriage 94
5.1.3 Indispensibility of children and of sons 96
5.1.4 Abstinence on religious days and after child birth 97
5.1.5 Family planning, Induced abortion, amniocentesis 98
5.1.6 Age of marriage 99
5.1.7 Ideal age of a woman at the birth of the first child 101
5.1.8 Maximum age of the mother at the birth of the last child 104
5.1.9 Ideal family size 105

5.2 Attitude on factors affecting fertility by occupation and by occupational level 106
5.2.1 Ideal age at marriage and at the birth of the 1st child 107
5.2.2 Ideal family building period 108
5.2.3 Abstinence 110
5.3 Son Preference 113
5.3.1 Open son-preference revealed from answers to direct questions 113
5.3.2 Disguised son preference revealed in the cost and benefit consideration of children of both sex
   A. Cost Considerations 116
   B. Returns expected from children 119

CHAPTER VI : KNOWLEDGE, ATTITUDE AND PRACTICE (KAP) OF FAMILY PLANNING 128

6.1 Knowledge of Family Planning 128
6.1.1 Knowledge of family planning before marriage 130
6.1.2 Knowledge of family planning centres 140
6.2 Attitude about family planning 144
   6.2.1 Approval of use of a family planning method immediately after marriage 146
   6.2.2 The Number of family planning methods for which respondent was favourable 146
   6.2.3 The most important factor deciding the number of family planning methods for which respondent was favourable - A multiple regression 148
   6.2.4 Quality of family planning methods about which respondent was favourable 149
   6.2.5 Likely action in case of accidental conception 155
6.3 Practice of family planning 158
   6.3.1 Practice of family planning for the whole sample 159
   6.3.2 Practice of family planning by occupation and by occupational level 171
      A. Aspects of family planning under consideration 171
      B. Timing of the first use of contraception 173
      C. Effectiveness of family planning method used initially 176
      D. Use of family planning method immediately after reaching the desired family size 181
      E. Effectiveness of the family planning method used immediately after reaching desired family size 185
      F. Success in the family planning method used immediately after reaching the desired family size 190
      G. Action taken on the failure of the family planning method used immediately after reaching the desired family size 193
      H. "Whether any conception" after reaching the desired family size ? 198
      I. Whether any unwanted conceptions ? 201
      J. Use of and success with different family planning methods 205

Conclusion 211
CHAPTER VII RESULTS OF CONCEPTIONS

7.1 Abortions: extent of induced & spontaneous abortions

7.2 Cause of spontaneous abortions

7.3 Induced abortion for spacings

7.4 Induced abortion for limiting family size

7.5 Action taken on the first conception after reaching the desired family size

Conclusions

CHAPTER VIII: COST OF CHILDREN

8.1 Limitation of 'opportunity cost' concept to measure the cost of children in the Indian situation

8.2 Other aspects of child bearing costs resulting from the combination of employment and child bearing

8.3 Gap between maternity leave needed & granted

8.4 Cost of 'Role Conflict': Factual details

8.4.1 Service related costs paid by an employed mothers

(a) Service related costs paid by an employed mother by the occupation of the respondent

i. Service related education after child birth by the occupation of the respondent

ii. Strain of service related education

iii. Giving up thought of service related education due to the responsibilities of child rearing

iv. Mental strain involved in giving up thought of service related education

v. Opportunity loss in service due to child birth or child rearing problems

vi. Mental strain involved in opportunity loss

vii. Postponement of promotion or permanency

viii. Half pay or without pay leave for child birth or child rearing

(b) Service related costs paid by the employed mother by the occupational level of the respondents

i. Service related education

ii. Strain of service related education

iii. Giving up thought of service related education

iv. Opportunity loss in service

v. Sufferings due to the loss of opportunity in service
8.4.2 Costs experienced by an employed mother in child-rearing
   a. Physical exhaustion and mental strain experienced by an employed mother 258
   b. Mental strain of child care arrangement 259
   c. Cost of child care arrangement 261
   d. Increase in the child rearing cost due to respondents' employment 265

Conclusion 266
References 267

CHAPTER IX: BENEFITS FROM CHILDREN 269
9.1 Pension motive 270
9.1.1 Old age support: Financial and Physical 270
9.1.2 Expectation of financial support from children 271
   A. Financial support under normal conditions 273
   B. Financial support in case of exceptional needs 273
9.1.3 Physical support in old age 277
9.1.4 Reasons for not depending on sons and daughters for physical support in old age 280
9.2 Income motive 283
9.2.1 Income expectations from sons 284
   A. Age at which income flow from sons is expected to begin 287
   B. Duration of income-flow from sons 294
9.2.2 Income expectations from daughters 295
9.3 Non-economic values of children 299
   A. Perception of the respondents of their present life in comparison to that of childless people 299
   B. Perception by respondent of their old age in comparison to that of childless people 302
9.4 Analysis of benefits from children by the occupational level of the respondents 306
9.4.1 Income expectations from sons by the occupational level of the respondent 306
9.4.2 Income expectations from daughters by the occupational level of the respondents 308
9.5 Comparison of present-life with the present life of childless people by the occupation of the respondent 309
9.6 Old age life as compared to that of childless people 311
