Acknowledgement

I do not find appropriate words to express my gratitude to my supervisor Prof. G. V. Singh for his able guidance and untold contribution to the successful completion of the Ph. D. work. It is only because of his sympathetic attitude, timely and indispensable help that enabled me to submit this thesis. For this, I will remain indebt throughout my life. I also offer my deep sense of gratitude to Dr. D. K. Lobiyal, Asstt. Prof., School of Computer & Systems Sciences (SC & SS), J.N.U. for his continuous exchange of ideas and valuable suggestions during the period of the work.

I am very fortunate that I got admitted in Ph. D. programme and now submitting the Thesis under the auspices of Prof. K. K. Bharadawaj, Dean, SC & SS, J.N.U. Special thanks go to Prof. S. Balasundaram, SC & SS, J.N.U., who had motivated to work in this prestigious university. I am also thankful to Prof. V. K. Jain, School of Environmental Sciences, J.N.U. for his critical suggestions during the compilation of the thesis.

I feel it my pleasant duty to place on record my profound and sincere thanks to Dr. D. K. Chaturvedi, Reader, Department of Electrical Engineering, Dayalbagh Educational Institute, Agra (U.P.) for his kind help in imparting the knowledge of MATLAB® and Fuzzy Logic Toolbox on which the concept of this thesis has been implemented. I am specially indebted and grateful to my friend Dr. Ibraheem, Reader, Department of Electrical Engineering, Jamia Millia Islamia (JMI), New Delhi for his ingenuous help and continuous painstaking assistance at each and every moment of time.

I would like to express my sincere thanks to Prof. Moinuddin, Head, Deptt. of Electrical Engineering, J.M.I. for providing all necessary assistance required from time to time. It is worthwhile to appreciate his efforts for creating the conducive-atmosphere and requisite infrastructure of academic and research activities in the department.

I owe a special depth of thanks to Prof. S. A. H. Rizvi and Dr. Zahid A. Khan, Lecturer, Deptt. of Mechanical Engineering, J.M.I. for their academic co-operation in the area of noise pollution. I am also thankful to my colleagues Mr. M. T. Beg, Reader, Deptt. of Electronics & Communication Engg., Mr. H. E. Akhtar and Dr. V. K. Sharma, Readers, Deptt. of Electrical Engg., J.M.I. for their kind support.
I must mention on top priority the special thanks to Mr. Qamruddin, Deptt. of Electrical Engineering, J.M.I. for his tireless help and devotion during the compilation of this thesis. His keen interest and help rendered towards the completion of this thesis will always be remembered. I am also thankful to Mr. Ghalib Husain of my parent department for his well wishes.

I should not forget to mention the contribution of my wife for having the patience during the whole period of my research work.

(Zaheeruddin)
