ACKNOWLEDGEMENTS

I. INTRODUCTION .......... 1-6
II. PREVIOUS LITERATURE ...... 7-26
III. MATERIAL AND METHODS ...... 27-35
IV. PRELIMINARY INVESTIGATIONS ...... 36- 37
V. DESCRIPTIVE (EXPERIMENTS AND RESULTS) ...... 38-77
A. Leaf bud meristem culture ...... 38-42
B. Regeneration of several buds
   from a single lbm ...... 42-44
C. Initiation of callus ...... 44
D. lbm callus subculture ...... 44
E. Leaf callus ...... 45-47
F. Root callus ...... 47-48
G. Experiments on regenerations
   (Regeneration of sporophytes) ...... 48-77
   a) Regeneration from lbm callus ...... 48
   b) Regeneration from lbm callus
      subculture ...... 49-50
   c) Regeneration of leaves from lbm
      callus subculture ...... 50-51
   d) Regeneration of roots from lbm
      callus subculture ...... 51-52
   e) Regeneration of roots from young
      sporophyte ...... 52-53
   f) Regeneration of sporophytes
      from lbm callus subculture ...... 53-56
g) Regeneration of sporophytes from leaf callus........ 56-58
h) Regeneration of root callus into sporophytes........ 58-59
(Regeneration of gametophytes)
i) Regeneration from lab callus subculture........ 59-61
j) Regeneration from a single cell or cell group........ 61-66
k) Regeneration from detached young roots........ 66-67
l) Regeneration from root callus........ 67-68
m) Regeneration from plantlet........ 68-69
n) Regeneration from scales........ 69-75
o) Some new experiments on regenerations........ 73-75
p) Some interesting cases of apogamy from aposporic gametophytes........ 75-77

VI. DISCUSSION AND CONCLUSIONS........ 78-98
VII. SUMMARY........ 99-100
VIII. LITERATURE CITED
