

Hereld, D. and Devreotes, P.N. (1992) The cAMP receptor family of 

propranolol negatively regulates the transcription of proliferating cell nuclear 
antigen (PCNA) gene and thereby suppresses DNA synthesis in regenerating 

Activation of the prespore and spore cell pathway of Dictyostelium differentiation 
by cAMP-dependent protein kinase and evidence for its upstream regulation by 
ammonia. EMBO. J., 12:2459-2466.
