

TABLE OF CONTENTS

	Page No.
List of Tables	i
List of Figures	ii–viii
List of Appendices	ix
Chapter 1: Introduction	1–33
1.1 Introduction	2
1.2 Synchros	4
1.3 Resolvers	5
1.4 Resolver to Digital Converter (RDC)	14
1.5 Resolver Parameters	23
1.6 Applications	25
1.7 Embedded System	26
References	32
Chapter 2: Literature Survey	34–78
2.1 Literature survey	35
2.2 Objectives	60
References	62
Chapter 3: Software Implementation of algorithm for RDC using Arctangent Technique	79–102
3.1 Introduction	80
3.2 Mathematical model of Arctangent Technique based RDC	82
3.3 Methodology	86
3.4 Results and Discussions	89
3.5 Conclusions	99
References	100

Chapter 4: Software Implementation of algorithms for RDC Using Angle Tracking Observer (ATO) Technique	103–116
4.1 Introduction	98
4.2 Mathematical model of Angle Tracking Observer Technique based RDC	105
4.3 Methodology	108
4.4 Results and Discussions	111
4.5 Conclusions	115
Chapter 5: Software Implementation of algorithms for RDC Using Modified ATO Technique	117–145
5.1 Introduction	118
5.2 Methodology	119
5.3 Results and Discussions	128
5.4 Conclusions	145
Chapter 6: Hardware Implementation of algorithms for RDC Using Modified ATO Technique	146–181
6.1 Experimental setup	147
6.2 RTD1B14Y1 Resolver	147
6.3 MAXON 273759 DC Motor	151
6.4 Signal Conditioning Circuit	153
6.5 ADC-DAC Board	154
6.6 ARM7 LPC2148FBD64 Application Specific Board	157
6.7 Experimental Results	164
6.8 Summary	180
References	181

Chapter 7: Conclusions and Future Scope	182–188
7.1 Conclusions	183
7.2 Future scope	188
Appendix	189–192
Index	193–194
List of Publications	195–196
