ACKNOWLEDGEMENT

It is my great privilege to express my profound and sincere gratitude to my respected project supervisor & research guide, Dr. Satish Chandra Bera for his valuable guidance, support and encouragement. Working with him on this thesis has been a very rewarding and pleasurable experience that has greatly benefited through out the course of work.

My special thanks and deep regards to the present and former Heads of the Department of Applied Physics, University of Calcutta for providing me the laboratory and facilities through out my research work. I also like to pay my deep regards and grateful thanks to Prof. Samir Kumar Basu, Lt. Prof. Shambhu Nath Dutt, Prof. Tapas Kumar Mitra, Prof. Debabrata Basu ,Prof. Asit Kumar Dutta and other teachers of the Instrumentation Engineering section of the Department of Applied Physics for their several invaluable discussions and other help during my work. I am thankful to Shri. Bhaskar Nag, Shri. Krisna Kumar Majumdar, Shri. Mani Biswas of Applied Physics department for various assistance to complete the research work.

I recall and remember with affection and gratitude my association with my friends and research colleagues Mr. Partho Sarathi Pal, Research Fellow, Electrical Engineering Department, Indian Institute of Technology, Karagpur, Mr. Palash Kundu, associate professor, Electrical Engineering, Jadavpur University, Mr. Subrata Chattopadhyay, associate professor, Teacher Training Institute, Govt. of India, Mr. Badal Chakraborty, Mr. Manab Mondal, Lecturers, Murshidabad Engineering college Dr. Rina Bhattacharya, Reader, Dept. of Environmental Science, Kalyani University and Mr. Swambhu Chatterjee of John Hoppkins college and university, USA

I also wish to express my thanks and regards to Dr. Nrisinha Mukherjee, a resident of USA and Prof. R. H. Harding a resident of U.K for inspiration and encouragement to fulfil my work.

My very special thanks to my brother Prosanta Kumar Ray, for his invermable technical help in designing and construction phases of various systems under the studies. Without him I could not been able to complete this work.

I must acknowledge MHRD and AICTE, Govt. of India for providing financial assistance to develop and fabricate various systems for experimental studies during my Ph.D. work.

Finally I wish to thank my wife, Gopa and my son, Joydeep for their constant source of inspiration and encouragement.

Jayanta Kumar Ray, 2004
