CONTENTS

CHAPTER I : GENERAL INTRODUCTION

CHAPTER II : REVIEW OF LITERATURE

1. Sources and occurrence of arsenic in the environment
   1.1 Natural production
   1.2 Industrial production
   2. Levels of exposure to arsenic and its compounds
      1. General population exposure through air, drinking water, food and beverages
      2. Occupational exposure
   3. Metabolism of arsenic
      1. Absorption
         1.1 Respiratory deposition and absorption
         1.2 Gastro-intestinal absorption
         1.3 Skin absorption
         1.4 Placental transfer
      2. Distribution in organisms
         1. Fate of arsenic in blood
         2. Tissue distribution
      3. Elimination
      4. Biotransformation
      5. Absorption, translocation and metabolism of arsenic in plants
   4. Normal levels in man and biological indicators of exposure
   5. Effects and dose-response relationships of inorganic arsenic
      1. Acute and subacute effects after short-term exposure
      2. Effects on reproduction and teratogenicity

(Contd......)
## CHAPTER III : MATERIAL AND METHODS

1. **Study of effects of arsenic salts under laboratory conditions**
   - **Experimental test systems**
     1.1 *In vivo* experiments on
        - A. Animal *in vivo*  
        - B. Plant *in vivo*  
     1.2 *In vitro* experiments on
        - C. Human lymphocyte *in vitro*  

2. **Material**
   - A. Animal test system *in vivo*
     - A.1 Preparation of reagents  
     - A.2 Test chemical  
   - B. Plant *test system in vivo*
   - C. Human lymphocyte *in vitro*
     - C.1 Preparation of reagents  
     - C.2 Test chemical  

3. **Method**
   - 3.A Animal test system
     - A.1 Maintenance and breeding  
     - A.2 Treatment

(iii)

i) Direct exposure of animals to chemical alone
ii) Exposure of animals to two chemicals - sodium arsenite and sodium selenite for studies of interaction

A.3 Preparation of slides
A.4 Scoring of slides

3.B Plants in vivo
B.1 Treatment and slide preparation
B.2 Scoring of slides

3.C In vitro on human lymphocytes
C.1 Methods of lymphocyte culture
C.2 Preparation of slides
C.3 Scoring of slides and statistical analysis

4. Statistical analysis
i) Calculation of 't' value
ii) Study of Cochran-Armitage trend test
iii) Study of analysis of variance (ANOVA)

A. Three way ANOVA
B. One way ANOVA

CHAPTER IV : OBSERVATIONS AND RESULTS
including tables, inferences, figures

A. Effects of sodium arsenate on plants in vivo
1. Effect on germination, root elongation, mitotic cell division and mitotic chromosomes (tables: A1 to A4; figures A1 to A8)

2. Evaluation of dose-related effect on mitotic cells after different periods of recovery (tables: A5; figure A9)

B. Effects of arsenicals on animals in vivo
1. On cell division (tables: B1 to B4; figures: B1 to B4; inference B1)
   a. After chronic exposure to
      i) Sodium arsenate
      ii) Sodium arsenite

(Contd......)
b. After acute exposure to sodium arsenate... 190-191

c. Comparison of both salts after chronic exposure... 192-193
d. Inference... 194

2. On chromosomal aberrations

a. After chronic exposures to -
   i) Sodium arsenate (tables B5I, B5II, B6; figures: B5 to B9; inference B2, B3)... 195-207
   ii) Sodium arsenite (tables: B7I, B7II, B8; figures: B10 to B13; inference: B4, B5)... 208-216
   iii) Comparison of both salts after chronic exposure (tables B9; figures B14 to B17; inference B6)... 217-223
   iv) Three-way ANOVA (tables: B10 to B12)... 224-227

b. After acute exposures to
   Sodium arsenate (tables B13I, B13II; figures B18, B19; inference B7)... 228-232

   After three acute exposure and one subcutaneous chronic exposure to sodium arsenite and the comparison (tables D1 to D3) and analysis of results using one-way ANOVA (tables D4 to D6)... 232-240

C. Effects of sodium arsenate on human leucocyte in vitro

1. Effect on mitotic index (tables C1, C3, C5; figures C1 and C2; inference C1)... 241-

2. Effect on frequency of micronuclei (tables C1, C3, C5; figures C3, C4, C5; inference C2)

3. Effect on chromosomes in individuals of each sex (tables C1 to C5; figures C6 to C15; inference C3, C4)

4. Comparison of effects on chromosomes in individuals of each sex (table C5; figures C16 to C19; inference C5)... – 272

5. Analysis of results on chromosomal aberrations using three-way ANOVA (tables: C6 to C9)... 273-278

6. Total effect combining data from both sexes and their comparison (tables C10, C11; figures C20 to C25; inference C6)... 279-281

(Contd.....)
### Chapter V: DISCUSSION

1. General 291-293
2. Effects on plant test system 293-294
3. Effects on animal test system *in vivo* 294-297
4. Effects on human leucocytes *in vitro* 297-299
5. Interaction between arsenic and selenium 299-300

### Chapter VI: SUMMARY

1. Published paper
   - Cytogenetic studies in human populations exposed to gas leak at Bhopal, India (1990): *Environmental Health Perspectives* (USA), 86: 323-326

2. Abstracts in International Conferences - Three
