ACKNOWLEDGEMENT

Firstly, I express my gratitude to my research guide, Professor Bireswar Banerjee, Department of Geography, University of Calcutta for his constant encouragement and guidance. I am also indebted to the University Grants Commission for financing the research without which it would have been difficult to carry on my research work and field surveys. Special mention must be made of Mr. Niranjan Ray, Directorate of Agriculture, Govt. of West Bengal who patiently supplied me with most of the required data for consecutive three months.

I am also grateful to my senior colleagues Dr. (Smt) Swapna Basu, Dr. (Smt) Sukla Sen and Smt. Ranjana Ray as well as my cousins Smt. Irani Chatterjee and Anjan Chatterjee for helping me during my field surveys. I express my thanks to the Directors and other personnel of the Indian Meteorological Department (Calcutta), Bureau of Applied Economics & Statistics, Central Ground Water Board (Calcutta), Major & Minor Irrigation Departments, Government of West Bengal and the Damodar Valley Corporation for providing me with all the data.

It would be too lengthy to mention the other numerous people who took a kindly interest in my work and helped me during my field surveys. Mention must be made of the Block Development Offices and others of Memari, Panduah, Old Maldah, Balarampur and Sagar blocks who have rendered me immense help by providing transport and lodging in addition to maps and data. In this context, I must acknowledge with thanks the sincere assistance and information supplied by the villagers. Mention must also be made of Mr. Majumdar, Soil Conservation Department, Puruliya, Mr. Dharmadas Chatterjee, Durgapur, Mr. K. G. Chatterjee, Chinsurah, Dr. S. Bera, Arambagh and Mr. Dibyendu Chakrabarty, Bolpur in whose house I lodged during my field surveys.

Lastly, but not least, I am grateful to my parents for their constant encouragement and help in various ways.
