ACKNOWLEDGEMENT

I take this opportunity to express my sincere thanks and gratitude to my research supervisors, Professor B. N. Mandal, Physics and Applied Mathematics Unit, Indian Statistical Institute, Calcutta, and Professor U. Basu, Department of Applied Mathematics, Calcutta University, for introducing me to this area of research and related topics in Applied Mathematics. My association with them as a research student provided me the inspirations and encouragements to pursue this research work.

This work was initiated when I was working in a UGC funded research scheme under BNM (PI) and UB (Co-I) in the capacity of a project assistant. I thank CSIR for the award of a SRF-ship, during the tenure of which this research work is completed. I also thank Indian Statistical Institute, Calcutta, for facilities to carry out this research work.

PRITY GHOSH
