ACKNOWLEDGEMENT

From the depth of my heart I express my deep sincere gratitude to the Almighty for the blessings bestowed upon me.

I would like to express my deep sense of gratitude, regards and sincere appreciation to my research guide Prof. Harish Kumar Sharma, Registrar, M.M. University, Mullana (Haryana) who suggested the problem, extended all facilities and provided inspiring guidance for the successful completion of my research work. I also have high regard for his excellent command and encouragement throughout this study. It’s my privilege that he has provided me the opportunity to work under his kind supervision. I ever remain indebted to him.

My heartiest gratitude is due to the management of M.M. University Mullana (Ambala) especially Dr Tarsem Kumar Garg, Chancellor, M.M. University, Mullana Ambala, Haryana, India for conceding me necessary permission for achieving this target.

I am thankful to Dr Rajshree Khare, Head of Chemistry Department, M.M. Engineering College, MMU, Mullana for providing me all facilities and making the things convenient to work here.

I owe thanks to Dr Sushil Kumar Mittal, Senior Professor, School of Chemistry and Biochemistry, Thapar Institute of Engineering Technology, Patiala, for his help and advice.

At this moment, I would like to make particular mention of valued colleague Dr Pernita Dogra for her support, help and sharing her ideas in the completion and successful compilation of the work.
The thesis would not be in its present state without the co-operation of my sweet daughters Simmi & Niki and my tiny and cute son, Sorhya.

I am indeed grateful to my husband Mr. Sanjeev Sharma who carved the idea to do the research and without whose unfltering support, patience and encouragement, I would never have completed this thesis.

My most special thanks go to my parents, parents in laws, my brothers and brother in law whose selfless sacrificial life, unreserved support and faith at every moment, throughout my education and at every turn of this journey. However, without them this would not have been possible, whatsoever.

Finally, I would also like to thank to all my colleagues especially Dr Vinod Kumar who have helped me directly or indirectly in the successful completion of my thesis. I am also thankful to all those whom I could not name here, for being near me in these years. I thank anyone missed in this acknowledgement who helped me at any stage during this work.

Date:
