## CONTENTS

### PART-I

**CHEMICAL STUDIES ON NYCTANTHES ARBOR-TRISTIS L.**

| SECTION A | Reviews on Nyctanthes arbor-tristis and on iridoid glycosides reported since 1989 till mid-1996 | ... | 1-57 |
| Traditional uses of Nyctanthes arbor-tristis | ... | ... | 1 |
| Botanical identities of Nyctanthes arbor-tristis Linn and its growing area | ... | ... | 1 |
| Chemical composition of N. arbor-tristis and bioactivity of components isolated | ... | ... | 2 |

| SECTION B | Studies on the chemical constituents of Nyctanthes arbor-tristis: Isolation and characterisation of a new acetate cum cinnamate ester of 6β-hydroxyloganin | ... | 58-100 |
| Isolation | ... | ... | 58 |
| Purity of glycoside-A | ... | ... | 58 |
| Characterisation of glycoside-A as 7-0-acetyl-6β-cinnamoyloxyloganin | ... | ... | 58-100 |
| Ultraviolet absorption characteristics of glycoside-A | ... | ... | 61 |
| Infrared absorption spectrum of glycoside-A | ... | ... | 61 |
| Proton magnetic resonance spectrum of glycoside-A | ... | ... | 63 |
| Two dimensional $^1$H-$^1$H correlation study and homodecoupling experiments: Partial structure of glycoside-A | ... | ... | 66 |
| Acetylation of glycoside-A to its tetraacetate | ... | ... | 71 |
| Homonuclear correlation spectral studies and homodecoupling studies on glycoside-A tetraacetate | ... | ... | 76 |
| Basic stereostructure of the glycoside-A | ... | ... | 81 |
| $^{13}$C NMR spectral studies of glycoside-A and its acetate | ... | ... | 87 |
| Mass spectral study of glycoside-A | ... | ... | 99 |

| SECTION C | Iridoid glycosides of polar fraction of EtOAc eluates of Nyctanthes arbor-tristis... | ... | 101 |
| 7-0-Benzoyl-6β-hydroxyloganin pentaacetate | ... | ... | 102 |

**PART - II**

**CHEMICAL CONSTITUENTS OF A SEA CUCUMBER, A SOFT CORAL AND A HOLOTHUROID**

**SECTION A :** The reviews on the chemical constituents of *Thorsonia*, *Nephthea* and *Cavernularia* species and on ceramides and cerebrosides from marine sources 126-139

- Ceramides and cerebrosides from marine organisms 127
- Bioactive constituents from marine sources 132
- A review on the chemical constituents of *Nephthea*, *Thorsonia* and *Cavernularia* species 136

**SECTION B :** Studies on the chemical constituents of the sea cucumber *Thorsonia investigatoris* 140-173

- Collection, identification and taxonomy 140
- Extraction, toxicity test and isolation studies 140
- Triglycerides 142
- Cholesterol 147
- Fatty acids 149
- 1-0-Alkyl glycerol 150
- Glucocerebrosides 154
- Action of acetic anhydride-pyridine on component 82 156
- Homodecoupling and homonuclear correlation studies on acetate 83 156
- $^{13}$C NMR spectral studies on glucocerebroside 82 and its hexaacetate 83 163
- Mass spectrum of the acetate 83 167
- Structural representation of glucocerebrosides in the mixture 169
Studies on a soft coral and a holothuroid

Soft coral: Collection, taxonomy and bioactivity

Holothuroid: Collection, taxonomy and its physical appearance

Recent investigation on Nephthea sp. and Cavernularia sp.

Wax esters (Fatty esters of fatty acids)

Ceramide

$^1$H NMR spectral studies of ceramide

Action of acetic anhydride on ceramide

$^1$H NMR spectral studies of ceramide diacetate

Homodecoupling experiment and homonuclear correlation studies of ceramide diacetate

$^{13}$C NMR spectrum of N-acyl-2-aminosphinga-4,8-diene-1,3-diol

Mass spectrum of the ceramide

Stereostructure of compound (ceramide)

Experimental

PART-III

CHEMISTRY OF TETRANORTERPENOIDs

Review on the chemistry of 6α-acetoxyazadirone

Transformation of 6α-acetoxyazadirone into 6α-acetoxy-1α,2α-epoxyazadirone and 6α-acetoxy-7-deacetyl-1α,2α-epoxyazadirone

6α-Acetoxy-1α,2α-epoxyazadirone

6α-Acetoxy-7-deacetyl-1α,2α-epoxyazadirone
Transformation of 6α-acetoxyazadirone into 6α-acetoxy-1α-methoxy-1,2-dihydroazadirone, 6α-acetoxy-7-deacetylazadirone, 7-deacetyl-6α-hydroxyazadirone and 6α-hydroxyazadirone, and of 6α-hydroxyazadirone into isonimocinolide

Hydrolysis of 6α-acetoxyazadirone : Formation of 6α-acetoxy-1α-methoxy-1,2-dihydroazadirone, 6α-acetoxy-7-deacetylazadirone, 7-deacetyl-6α-hydroxyazadirone and 6α-hydroxyazadirone

6α-Acetoxy-1α-methoxy-1,2-dihydroazadirone

6α-Acetoxy-7-deacetylazadirone

7-Deacetyl-6α-hydroxyazadirone

6α-Hydroxyazadirone (25)

Oxidation of 6α-hydroxyazadirone by m-CPBA into the insect regulator meliacin, isonimocinolide

6α,21-Dihydroxy-20,21,22,23-tetrahydro-23-oxo-azadira-1,2,20,22-dien-3-one

6α-Acetoxy-1α,2α,14β,15δ-diepoxy-17-hydroxy-20,21,22,23-tetrahydro-16,21-dioxo-20,22-en-azadirone

6α-Acetoxy-14β,15δ-epoxy-17-hydroxy-20,21,22,23-tetrahydro-16,21-dioxo-20,22-en-azadirone
