

ACKNOWLEDGEMENT

I take this opportunity to express my deep sense of gratitude to Prof. A.B. Biswas, Indian Institute of Technology, Bombay, for his valuable guidance during the course of this work. I am indebted to Dr. S.S. Katti and Mr. R.N. Shukla for many stimulating discussions and constructive suggestions, and to Dr. (Miss) M.V. Natekar for kindly providing samples used in the present studies. It is a pleasure to acknowledge the kind co-operation given by my colleagues at all levels.

The work reported in this thesis was carried out by me as a research scholar at the National Chemical Laboratory, Poona, in a project on "Investigation of the synthesis and properties of new types of glycol mono-alkyl ethers for the control of water evaporation to extend the industrial utilisation of cottonseed oil", financed by the U.S. Department of Agriculture, under the P.L. 480 Programme.

I am grateful to the Director, National Chemical Laboratory, Poona, for permission to submit this work in the form of a thesis.

YOGESH KUMAR KUCHHAL
