ACKNOWLEDGEMENT

First and foremost, I wish to express my profound gratitude to my esteemed supervisors, Prof. A.K. Mathur and Prof. R.K. Sharma, for their expert guidance in the completion of this thesis. Without their generous help and kind co-operation, this task would not have been completed. I will always cherish the moments of my working with them.

I am also grateful to the members of the faculty in the Centre for the Study of Regional Development (C.S.R.D.), especially Prof. S.K. Thorat, and Prof. G.K. Chadha (presently Vice-Chancellor of the University), for offering valuable comments that went a long way in improving the thesis. Prof. S.K. Thorat was a great source of inspiration to me from the very initiation of this study programme. My sincere thanks are also due to the staff of the Centre for all their help and co-operation.

I am highly obliged to the Jawaharlal Nehru University for providing me the academic platform for carrying out this research study. I am also thankful to the Monopolies and Restrictive Trade Practices Commission, and the Department of Economic Affairs, Ministry of Finance, Government of India, for granting me Leave for undertaking this study.

My thanks are due to the Department of Information Technology, Electronics and Computer Software Export Promotion Council, National Association of Software and Services Companies, Manufacturers Association of Information Technology, Confederation of Indian Industry, the publishers of Dataquest and all other data sources, for the considerable help received from them in obtaining the requisite data and other information. I owe a special debt of gratitude to the Centre for Monitoring the Indian Economy for providing me with the firm-level data pertaining to the computer software and hardware units in India which was highly useful in several areas of critical analysis pertaining to the study.

I cannot express in words my gratitude to my spiritual Guru, Sri Mata Amritanandamayi Devi, popularly known as “Amma”, whose blessings alone enabled me to initiate and progress in this study programme.
I would also like to place on record my gratitude to Shri Jayaparakash Pradhan, Research Scholar in C.S.R.D., for his valuable discussions and the time he has devoted for me at various stages of this study.

I will be failing in my duty if I do not acknowledge my thanks to my brother, Mr. K.G. Manmadhan Nair, co-brother, Mr. Radhakrishnan Haridasan, and sister-in-law, Mrs. Sreelatha Radhakrishnan, who are presently settled in U.S.A., for getting me valuable literature and data on the US IT industry as well as insight into several conceptual issues related to the industry. I am also grateful to my parents for their counsel, guidance, and inspiration in the fulfillment of my educational desires, which really stood me in good stead in the course of this research endeavour. Gratitude is also due to my in-laws, in particular my father-in-law, who always used to inspire me for an early completion of the task.

Last but not the least, I owe a deep debt of gratitude to my wife, Mrs. Pushpa Radhakrishnan, and daughter, Ms. Lakshmi Radhakrishnan, for their constant inspiration and encouragement in the completion of this study programme.

K.G. Radhakrishnan
