ACKNOWLEDGEMENT

I wish to place on record my profound sense of gratitude and indebtedness to Dr. K.M. Pandalai, Retired Director, Central Coconut Research Station, Kasaragod for suggesting the problem, guidance given and critically going through the thesis.

I am immensely thankful to Dr. K.V. Ahamed Bavappa, Director, Central Plantation Crops Research Institute, Kasaragod, for his keen interest in the work providing necessary facilities and encouragements at every stage of the work.

I wish to specially place on record my indebtedness to my colleagues Kumari C.B. Kamala Devi and Mr. P. Abdul Wahid of the Soil Chemistry Division, and Dr. P.K.R. Nair, Agronomist (Soils) and Mr. K. Kunhikrishnan, Junior Scientific Officer for their help and sustained encouragement throughout the course of the work and preparation of the thesis.

Thanks are due to Mr. S.S. Pillai, Statistician and Mr. K.V. Sathe, Junior Statistician, Institute of Agricultural Research Statistics, New Delhi for computer analysis of the data and also to Messrs. Jacob Mathew and M.V. George, Statisticians of this Institute
for their help in the Statistical analysis of the data.

I am extremely thankful to the Indian Council of Agricultural Research for permitting me to utilise the data for this thesis.

Kasaragod,

15.12.1975

(N. Gopalakrishna Pillai)
