ACKNOWLEDGEMENTS

I wish to express my deep sense of gratitude and indebtedness to Dr. V. Jayaprakas, M.Sc., M.Phil., Ph.D., Professor, Department of Aquatic Biology and Fisheries, University of Kerala, for suggesting the topic, excellent guidance and encouragement received throughout the course of the work.

I am grateful to Dr. P. Natarajan, M.Sc., Ph.D., Professor and Head, Department of Aquatic Biology and Fisheries for providing the necessary facilities to carry out the work successfully.

I am very much obliged to Mr. M.A. Majeed Sahib, owner of the fish farm at Mayyanad for extending facilities to conduct experiments.

My sincere thanks to Sri. N.K. Balasubramanian, Reader in Biostatics and Dr. T. Vasudevan Nair, Senior Chemist of the Department of Aquatic Biology and Fisheries for their valuable help.

I have great pleasure to record my thanks to Dr. P. Keshavanath, Professor and Head, Department of Aquaculture, College of Fisheries, Mangalore for his valuable suggestions.

I thank all the tutors, research scholars and other staff of the Department of Aquatic Biology and Fisheries for their immense help during the period of the work.

My very special thanks to Mr. Sunil, V. and Miss. Sherly, D. for their help and companionship throughout the course of the work.

I owe much to my Vanchinadu and boyhood friends for their sincere help and co-operation.

I thank the University of Kerala for awarding a Research Fellowship for the successful completion of this work.

My sincere thanks are also due to Mr. Madhu and Mr. Anil Kumar, Sai Computers, Pettah, TVM for the excellent typing and graphics in the preparation of this thesis.

I am indebted to my brother, sister and brother-in-law for their prayers, moral support and encouragement throughout the course of my study.

SAMBHU. C.
