ACKNOWLEDGEMENTS

I wish to express my sincere thanks and gratitude to Dr. R.K. Basu, Reader, Cytogenetics Laboratory, Bose Institute, Calcutta, for his guidance, supervision, valuable suggestions and ungrudging help during the course of the present investigation.

Thanks are also due to the Director, Bose Institute, and the Head of the Department of Botany, Bose Institute, Calcutta for providing facilities.

I wish to thank Dr. S.K. Datta, Mutation Breeding Laboratory, National Botanic Gardens, Lucknow, for providing me with some rare references for the present investigation.

Last but not the least my thanks are due to Dr. K.K. Mukherjee and my other colleagues for their cordial help during the course of present investigation.
