Chapter	Page No.
----------------	-----------------

CHAPTER 1

General Introduction & Literature Review	1-14
---	-------------

- 1.1 General introduction**
- 1.2 Review of literature**
- 1.3 Excessive use of pesticides in agriculture farming**
- 1.4 Choice of the standard fish**
- 1.5 Aims and objectives**

CHAPTER 2

Materials and Methods	15-28
------------------------------	--------------

- 2.1 Biology, procurement and maintenance of test species**
- 2.2 Acute toxicity test**
 - 2.2.1. Preparation of Nuvan solution*
 - 2.2.2. Bioassay experiment*
- 2.3 Determination of LC₅₀ value of Nuvan**
 - 2.3.1. The graphical interpolation method*
 - 2.3.2. The calculation method*
- 2.4 Histopathological studies**
 - 2.4.1. Processing of tissues*
- 2.5 Biochemical studies**
 - 2.5.1. Tissue homogenates*

2.5.2. *Protein estimation*

2.5.3. *Estimation of glycogen*

2.6 Statistical methods used

CHAPTER 3

Bioassay Experiment

29-43

3.1 Introduction

3.2 Observations

3.2.1 *Physico-chemical characteristics of test medium*

3.2.2 *The bioassay experiment with Nuvan to Indian freshwater catfish *Clarias batrachus*.*

3.2.3 *The determination of LC₅₀ value by various parameteic methods.*

3.2.4 *Comparison of LC₅₀ values determine by various method.*

3.3 Discussion

CHAPTER 4

Toxicological Evaluation

44-73

4.1 Histopathological studies

Effect on liver kidney gills and intestine

4.1.1 Introduction

4.1.2 Observation

4.1.2.1 *Histological effect on liver*

4.1.2.2 *Histological effect on kidney*

4.1.2.3 *Histological effect on gill*

4.1.2.4 *Histological effect on intestine.*

4.1.3 Discussion

4.2 Biochemical studies

Proteins and carbohydrates in liver and kidney

4.2.1 Introduction

4.2.2 Observation

a. *Total protein*

b. *Glycogen*

4.2.3 Discussion

CHAPTER 5

Summary and Conclusion

74-79

Bibliography

80-117
