ACKNOWLEDGEMENT

Acknowledgement of the favours received and privileges enjoyed is not simply a matter of going through a time honoured ritual. It is having the pleasure and satisfaction of discharging various debts of gratitude. Even the best calligraphy can not sufficiently express my gratitude to those, who with such good grace gave a bucketful of strength to me in the completion of the present work.

The Present work, reflects the influence of Dr. R.P.Tripathi, M.S., Associate Professor in Department of Orthopaedics, under whose distinguished and erudite guidance, the work was carried out. His constant and meticulous supervision of every minute detail, constructive and valuable criticism and efficient beneficence throughout this study have made this travail delightful and possible for me.

Dr. A.K. Gupta, M.D., Associate Professor in Department of Radiology, has earned my gratitude for the thoroughness with which he has checked my work.

I am sincerely thankful to Prof. P.K. Dabral, M.S., Head of the Department of Orthopaedics for his kind acquiescence to perform this work in the department of Orthopaedics.
The help rendered by Dr. Rakesh Tripathi, M.S., Dr. Murari Lal, M.S., and Dr. Narendra Anandani, M.S., is highly commendable. I also appreciate and thank all my well-wishers for keeping my spirits high at every step.

I dedicate my work to love and understanding shared by my wife Dr. Neeta Agarwal, Ph.D., and other family members, which was the source of inspiration and solace to me for execution of this cumbersome task.

I am also thankful to Shri P.C. Sachan and Mr. Prakash Sahu, who have assiduously converted the manuscript to the presentable typed form.

Lastly, I am highly obliged to the subjects of this study whose co-operation was but essential for the success of this work.
