ACKNOWLEDGEMENTS

First and foremost, the author of the present thesis would like to express his sincere thanks and profound gratitude to his supervisor Dr. B.G. Vishnuram, Principal, EASA College of Engineering and Technology, Coimbatore, for his valuable guidance, earnest encouragement and sustained support extended to him during the entire course of this research work. But for his meritorious motivation, this thesis would not have been completed successfully in time.

The author wishes to record his sincere thanks and gratitude to his PG Professor and Thesis Guide Dr. N. Arunachalam, for his sustained and invaluable guidance during research work. The author expresses his gratitude to the Doctoral Committee Members Dr. E.B. Perumal Pillai and Dr. R. Kumutha for their valuable advice, constructive comments and practical suggestions offered to him at various stages of the research.

The author would like to extend very special, heartfelt thanks to Smt. S. Malavizhi, Chairperson and Managing Trustee, Sri Krishna and VLB Institutions, for her generous gesture in permitting him to pursue the research programme. The author is greatly indebted to Dr. R. Soundararajan, Principal, Sri Krishna College of Technology, and Dr. R. Venkatasuubramani, Professor and Head of the department of Civil Engineering, for having provided all the facilities required for pursuing the research work.

The author wishes to convey his special thanks to all his colleagues in the Civil Engineering department, and all the non-teaching staff of the department for their timely help and assistance rendered during the period of research. He wishes to express his gratitude to all the personnel and friends who had helped him in one way or another to complete this thesis. Finally, the author wishes to extend his special thanks to all his family members for their loving kindness, limitless patience and affectionate attention which had helped him in no small way, to achieve this milestone in his professional career.

MARUTHACHALAM D
