

## CONTENT

INTRODUCTION.....	1-15
Discovery and Naming.....	1
Occurance .....	2
Chemistry of Mercury .....	2
Transformation of Mercury in Environment.....	3
Sources of Mercury.....	5
Uses of Mercury .....	7
Toxicity of Mercury .....	7
Chemical Methods of Removal of Mercury.....	10
Microbial Removal of Heavy Metal .....	15
SCOPE OF WORK.....	23
PRESESNT PLAN PROGRAMME .....	24
SCREENING OF MICROORGANISMS AND DEVELOPMENT OF Hg <sup>++</sup> RESISTANT STRAIN FOR IMPROVED Hg <sup>++</sup> BIOSORPTION.....	26-32
Materials and Methods .....	26
Result and Discussion .....	29
SELECTION OF THE MEDIUM FOR THE MAINTENANCE OF THE RESISTANT <i>Saccharomyces cerevisiae</i> A100 .....	33-34
OPTIMIZATION OF PHYSICAL PARAMETERS FOR BIOSORPTION OF Hg <sup>++</sup> BY Hg <sup>++</sup> RESISTANT <i>Saccharomyces cerevisiae</i> A100 .....	35-45
Materials and Methods.....	39
Result & Discussion .....	40
SELECTION OF SUITABLE CARBON AND NITROGEN SOURCES FOR BIOSORPTION OF Hg <sup>++</sup> BY Hg <sup>++</sup> RESISTANT <i>Saccharomyces cerevisiae</i> A100.....	46-53
A. Selection of Suitable Carbon Source For biosorption of Hg <sup>++</sup> by Hg <sup>++</sup> resistant <i>Saccharomyces cerevisiae</i> A100.....	46

Material & Methods .....	48
Result & Discussion .....	48
<b>B. Determination of the Optimum Concentration of Glucose for the biosorption of Hg<sup>++</sup> by <i>S.cerevisiae</i>A100 .....</b>	<b>49</b>
<b>C. Selection of Suitable Nitrogen Source for biosorption of Hg<sup>++</sup> by <i>S.cerevisiae</i>A100 .....</b>	<b>50</b>
Material & Methods .....	51
Result & Discussion .....	52
<b>D. Determination of Optimum Concentration of Urea for biosorption of Hg<sup>++</sup> by <i>S.cerevisiae</i>A100 .....</b>	<b>52</b>
<b>MINERAL ELEMENTS REQUIREMENT OF <i>Saccharomyces cerevisiae</i>A100 FOR BIOSORPTION OF Hg<sup>++</sup> .....</b>	<b>54-69</b>
Material & Methods .....	59
Result & Discussion .....	61
<b>A. Effect of Macro Element On Biosorption of Hg<sup>++</sup> .....</b>	<b>61</b>
<b>B. Effect of Trace Element On Biosorption of Hg<sup>++</sup> .....</b>	<b>65</b>
<b>EFFECT OF COMPLEX NUTRIENTS ON BIOSORPTION OF Hg<sup>++</sup> BY <i>Saccharomyces cerevisiae</i>A100 .....</b>	<b>70-76</b>
Material & Methods .....	71
Result & Discussion .....	73
<b>EFFECT OF AMINO ACIDS, VITAMINS, METABOLIC INHIBITORS AND ANTIBIOTICS ON BIOSORPTION OF Hg<sup>++</sup> BY <i>Saccharomyces cerevisiae</i>A100.....</b>	<b>77-95</b>
<b>I. Effect of Amino acids on on biosorption of Hg<sup>++</sup> by <i>Saccharomyces cerevisiae</i>A100.....</b>	<b>77</b>
Material & Methods .....	79
Result & Discussion .....	79
<b>II. Effect of Vitamins on on biosorption of Hg<sup>++</sup> by <i>Saccharomyces cerevisiae</i>A100.....</b>	<b>81</b>
Material & Methods .....	83
Result & Discussion .....	84

III. Effect of Metabolic inhibitor on biosorption of Hg <sup>++</sup> by <i>Saccharomyces cerevisiae</i> A100.....	86
Material & Methods .....	86
Result & Discussion .....	87
IV. Effect of Antibiotics on biosorption of Hg <sup>++</sup> by <i>Saccharomyces cerevisiae</i> A100.....	90
Material & Methods .....	91
Result & Discussion .....	92
EFFECT OF SURFACE ACTIVE AGENT ON BIOSORPTION OF Hg <sup>++</sup>	
BY <i>Saccharomyces cerevisiae</i> A100 .....	96-98
Material & Methods .....	96
Result & Discussion .....	97
BIOCHEMICAL CHANGES DURING BIOSORPTION OF Hg <sup>++</sup> BY	
<i>S.cerevisiae</i> A100 .....	99-112
I. Utilization of carbon (glucose) during biosorption of Hg <sup>++</sup> by <i>S.cerevisiae</i> A100 .....	99
Material & Methods .....	100
Result & Discussion .....	100
II. Nitrogen balance during Biosorption of Hg <sup>++</sup> .....	101
Material & Methods .....	102
Result & Discussion .....	102
III. Sub-cellular distribution of biosorbed Hg <sup>++</sup> in <i>S.cerevisiae</i> A100.....	103
Material & Methods .....	103
Result & Discussion .....	103
IV. EDTA Extraction of Cell Surface bound Hg <sup>++</sup> .....	104
Material & Methods .....	104
Result & Discussion .....	104
V. Effect of Biosorption on Enzyme Activity of <i>S.cerevisiae</i> A100.....	105
Material & Methods .....	106
Result & Discussion .....	106

<b>BIOSORPTION OF Hg<sup>++</sup> BY DEAD Hg<sup>++</sup> RESISTANT (35ppm)</b>	
<i>Saccharomyces cerevisiae</i> A100 .....	113-117
Material & Methods .....	113
Result & Discussion .....	114
<b>REGENERATION OF BIOSORBED Hg<sup>++</sup> FROM <i>S.cerevisiae</i>A100</b> .....	118-120
Material & Methods .....	118
Result & Discussion .....	119
<b>INSTRUMENTAL ANALYSIS OF BIOSORPTION OF Hg<sup>++</sup> BY</b>	
<i>S.cerevisiae</i> A100 .....	121-136
<b>A. FTIR Spectroscopic study of live and dead biomass before and after</b>	
<b>biosorption of Hg<sup>++</sup></b> .....	121
Material & Methods .....	121
Result & Discussion .....	122
<b>B. Scanning electron microscopy with combined energy dispersive atomic x-ray</b>	
<b>analysis of live and dead biomass before and after biosorption of Hg<sup>++</sup></b> .....	129
Material & Methods .....	133
Result & Discussion .....	133
<b>SUMMARY OF THE THESIS</b> .....	137-143
<b>REFERENCES</b> .....	144-161
<b>LIST OF PUBLICATION</b>
