ACKNOWLEDGEMENTS

One of the greatest joys of completing this fulfilling journey is to look back and remember all the people who have been a blessing to me during the most challenging time of my Ph.D life. It is therefore a great pleasure to convey my gratitude to all of them in my humble acknowledgement.

First and foremost I would like to thank and express my heartfelt gratitude to my Supervisor Prof. Swapan K Datta for providing me the opportunity to complete my PhD thesis at Plant Molecular Biology and Biotechnology Lab, Department of Botany. He has been an inspirational role model to me and I truly appreciate his continuous support, unflinching encouragement and invaluable guidance that has helped me to accomplish my research work successfully. Through the years his enthusiasm and sheer passion towards research has left a deep impression on me and have inspired me to see things positively and trust my abilities. I am deeply indebted to my Supervisor and hope that I can in turn pass on the research values and dreams that he has given to me.

My gratitude extends to my Associate Supervisor, Dr. Karabi Datta, Department of Botany, who has always encouraged my work and given me constructive feedback. I am thankful to her for the valuable advices on every aspect of my research work and also for sharing her immense knowledge and experiences that have helped me in more ways than one.

I would also like to express my sincere thanks to Dr. Sailendra Nath Sarkar, Assistant Research Professor, PMBBL, Department of Botany, for his worthy advice and helpful suggestions. I must appreciate for his ever ready helping attitude and also the knowledge that he imparted over the scientific discussions which always motivated me as a researcher.

My appreciation likewise extends to Dr. Aryadeep Roychoudhury and Dr. Palas K Chanda, Research Associate, PMBBL for sharing their knowledge and past experiences which helped a lot for thriving through this challenging path of research.
I gratefully acknowledge to my ever encouraging senior Soumitra Paul, PMBBL, who has been very closely associated with my research work. He has continuously helped and supported me with his healthy criticism, suggestions and constant co-operation during the period of this study. At times of failures he has always motivated me to carry on and try harder which gave me a moral boost to move forward with my ideas.

My sincerest thanks goes to Dipak Gayen PMBBL, for his supportive encouragements, logical discussions and constant co-operation.

I want to thank past members of the lab, Basudev da, Kankana di, Anuradha, Sohini, Lopamudra, Kaushik, Sourav, Satarupa, Rahul, Saptarshi and Shyam for extending their help and support and also for all the memorable happy moments we shared together in our lab.

I would also like to thank my fellow labmate Moumita, and all the juniors Kutub, Satabdi, Proshanta, Debjani, Priyanka, Subhasis, Subhrajyoti, Shuvobroto, Aritra, Sananda and Shinjini for their valuable support and their skill in spreading happiness and fun during the days I spent in the lab. I am also thankful to Sayani, Lab research assistant and Pratap, Field research assistant, PMBBL, for their co-operative assistance in the lab and field. I would also like to acknowledge Bandana di, Sudarshan and Ranadip for their official co-operation during the research work.

I would also take this opportunity to gratefully acknowledge Prof. A.K Biswas, Department of Botany for being a very motivational and inspirational teacher to me.

I wish to extend my sincere gratitude to all my respected teachers of Botany Department, University of Calcutta for their needful support and kind cooperation. I am also thankful to Head, Department of Botany, University of Calcutta for providing me all the administrative and departmental support. Thanks are also due to all the supporting staff of Botany Department for their needful help.

I am indebted to all my friends for their generous friendship and ever sustaining encouragement during the research work and completion of my thesis.
Finally, I wish to express my love and deepest gratitude to all my family members. I would particularly like to thank my parents, Mummy and Papa for always motivating and inspiring me to continue even in the most difficult times I have gone through. They always had the confidence and faith in me and trusted my abilities completely. Many thanks to my dearest sister Nausheen, who helped me see the positive side of every situation and face it with full conviction. Wholehearted thanks to my fiancé Meerakhan, who has been very encouraging and supportive through the completion of my thesis.

Financial assistance received from Department of Biotechnology, Govt. of India for completion of the research work is duly acknowledged.

Above all, I would give my highest gratitude to our Almighty Allah for being a constant strength during the weak times, and for surrounding me with such great people, who never failed to help me in all my endeavors.

Thank you all for everything!!

Nusrat Ali
