The present thesis deals with a part of the work done by the author in the Department of Magnetism, Indian Association for the Cultivation of Science, Calcutta, since 1976.

The author wishes to express his greatest indebtedness to Dr. R.K. Mukherjee, Lecturer in Physics, Department of Magnetism, Indian Association for the Cultivation of Science for introducing him in the subject, providing guidance and encouragement throughout the progress of the work. The author also wishes to express his deep and sincere gratefulness to Prof. M. Chowdhury, F.N.I., F.A.Sc. for suggesting the problem, for his keen interest in the work and constant valuable discussions and suggestions during the whole period of the work.

It is a pleasure on the part of the author to acknowledge the various helps and suggestions received from Drs. S. Ray, D. Ghosh, S. P. Ghosh, N. Roychowdhuri and other faculty members of the Association.

The author also gratefully acknowledges the help and encouragement received from all his friends, well-wishers and research co-workers, in particular, Drs. A. K. Banerjee, S. P. Bhattacharyya, A. C. Sen and M/s. S. Ghosh, S. K. Sarkar, G. B. Talapatra, D. Nath, P. K. Majumdar, P. K. Chatterjee and others.

Special thanks are due to Mr. T. K. Moulik for carefully typing the manuscript.
Thanks are also due to the authorities of the Indian Association for the Cultivation of Science for the award of a senior fellowship and for providing laboratory facilities.

Dated, Calcutta, the 28th August, 1981.

Bikas Ghosh.

Department of Magnetism, Indian Association for the Cultivation of Science, Calcutta 700032, India.
