Chapter No.	Particulars	Page No.
	LIST OF TABLES	
	LIST OF FIGURES	
	LIST OF GRAPHS	
	LIST OF PICTURES	
1	INTRODUCTION	1 to 5
2	SCOPE AND OBJECTIVES	6 to 7
3	REVIEW OF LITERATURE	
3.1	Need of Watershed Approach: A Look Back	8 to 10
3.2	Different watershed approaches: the global scenario	10 to 13
3.3	Watershed development under Indian scenario	13 to 16
3.4	Watershed prioritization and management: The GIS approaches	16 to 19
3.5	Soil / Land Recourse Studies and Management in Different Watersheds	19 to 24
4	MATERIALS AND METHODS	
4.1	Instruments	25 to 26
4.2	Methodology	
4.2.1	Watershed Delineation	26
4.2.2	Soil Survey in the Delineated Watershed	26
4.2.3	Micro- Watershed Selection	27 to 29
4.2.4	Soil Survey (1:4000) for the Selected Micro-Watershed	29
4.2.5	Soil Analysis	
4.2.5.1	Soil Physical and Hydrological Properties	30 to 31
4.2.5.2	Soil Chemical Properties	31 to 33
4.2.5.3	Soil Fertility Parameters	33 to 34
4.2.5.4	Total Analysis	34 to 35
4.2.5.5	Mineralogy	34 to 35
4.2.6	Soil Erosion Estimation	35
4.2.7	Socio-Economic Study	35

Chapter No.	Particulars	Page No.
	4.2.8 Land Capability and Soil Site Suitability Study:	36 to 39
	The need for assessing related parameters for suggesting action plan / landuse	
4.3	Action Plan (Suggested on micro-watershed basis)	
4.3.1	Fertilizer Scheduling	40
	in terms of N, P ₂ O ₅ and K ₂ O (Step I)	
4.3.2	Lime Requirement Schedule (Step II)	40
4.3.3	Land Capability and Soil Site Suitability (Step III)	40
4.3.4	Generalized Action Plan (Step IV)	40 to 41
4.4	Software Supports	
4.4.1	In Mapping	41
4.4.2	In Statistical Analysis	41
5	RESULTS AND DISCUSSION	
5.1	Climatic Database of <i>Patloi Nala</i> Micro-Watershed	42
5.2	Socio-Economic status of <i>Patloi Nala</i> Micro-Watershed	
5.2.1	Demographic sketch	43
5.2.2	General Overview	43
5.3	Soil Resources Mapping / Inventory	
5.3.1	Landform and Soil Site Characteristics of the Micro-Watershed	44 to 45
5.3.2	Identified Soil Series and their Classification	
5.3.2.1	Soils of Upland	46
5.3.2.2	Soils of Medium Land	48
5.3.3.3	Soils of Medium Low Land	48
5.3.3.4	Soils of Low Land	49

Chapter No.	Particulars	Page No.
	5.3.3 Soil Morphology	
	5.3.2.1 Soil Colour	50
	5.3.2.2 Structure and Consistency	50
	5.3.4 Physico-Chemical Properties of Soil	
	5.3.4.1 Soil Chemical Properties	51 to 53
	5.3.4.2 Soil Acidity: An Identified Problem of the Concerned Area	53 to 54
	5.3.4.3 Soil Fertility Status	54 to 57
	5.3.5 Soil Physical Properties	57
	5.3.6 Soil Moisture Characteristics	
	5.3.6.2 Soil Moisture Characteristic Curve	57 to 58
	5.3.6.3 Some Typical Moisture Retention Parameters	59
	5.3.7 Assessment of Soil Erosion	59
	5.3.8 Total Analysis	
	5.3.8.1 Total Nutrients	60
	5.3.8.2 Total Oxides	60
	5.3.9 Mineralogy	61
5.4	Suggested Land Use / Action Plan	
	5.4.1 Nutrient Scheduling	62 to 63
	5.4.2 Lime Requirement Study	63

Chapter No.	Particulars	Page No.
5.4.3	Study of Soil site Suitability	
5.4.2.1	Soil Site Suitability for Rainfed Rice (Bunded)	65
5.4.2.2	Soil Site Suitability Irrigated Rice	66
5.4.2.3	Soil Site Suitability for Wheat	67
5.4.2.4	Soil Site Suitability for Maize	68
5.3.4.5	Soil Site Suitability for Groundnut	69
5.3.4.6	Soil site suitability for Potato	69 to 70
5.4.3	A Comparison between Soil Site Suitability and Respective Productivity (Q/ha)	70 to 72
5.4.4	Action plan as a whole after Identifying Critical Patches	72 to 73
6	SUMMARY AND CONCLUSIONS	
6.1	Critical and Priority Area Demarcation for making Detailed Soil Resource Inventory	74 to 77
6.2	Action Plan at a Glance	77 to 78
6.3	Salient Achievements	78
6.4	Future Projection	79
7	BIBLIOGRAPHY	80 to 93
	Appendix I: Brief Description of the Soil Series (1:50,000) of Upper Kasai Watershed	I to II
	Appendix II: Critical Limits of Six Parameters Proposed as Per Local Knowledge Base	III
	Appendix III: Level of Significance	III
	Appendix IV: Scientific Names of the Selected Crops	III
