ACKNOWLEDGEMENT

It is time now to express my deep sense of gratitude and thanks to Dr. R.S. Kushwah, Department of Chemistry for the able guidance and supervision he provided to me at every step in bringing forth this thesis. His sustained interest and encouragement paid a great deal during the course of my study.

The thesis would not have been in the present form but for the interest taken and help given by Dr. M.N. Beg, Reader in Department of Chemistry, Aligarh Muslim University, Aligarh. Therefore I owe my indebtedness to him.

Grateful thanks are due to Dr. S.C. Shrotriya, Ex-Principal and Prof. R.P. Khadelwal, Principal and Dr. H.N. Singh, Head of the Department of Chemistry, Bipin Bihari College, Jhansi for providing the necessary facilities during the research period.

My sincere thanks go to Dr. S.L. Agarwal, Department of Chemistry, who never failed to give me his valuable suggestions and took personal interest to enrich my knowledge. I am also grateful to Dr. V.I. Sharma, DR. A.K. Shrivastav and Dr. O.P. Yadav for their kind help and time to time suggestions.

I express my sincere appreciation to Mr. M.Z.U. Siddiqui and Mr. M.A. Ansari for their cooperative deal and labour in the thesis.

I am much thankful to Shri R.S. Rai, Junior laboratory
in-charge of the chemistry department of Bipin Bihari College for maintaining a healthy research atmosphere.

I am highly indebted to my father, mother and younger sisters for the suitable atmosphere, the keen interest and constant inspiration received from them in the progress of my work.

My acknowledgement would be incomplete without mentioning the thanks to my father-in-law, Dr. Z. Hasan, Department of English, K.R. College, Mathura, for the enthusiasm and zeal created for my achievements.

(NAHEED AKHTAR)
