

## FOREWORD

The thesis entitled "Studies on the biosynthesis of L-ascorbic acid in different species" is submitted for the degree of Doctor of Philosophy (Science) of the University of Calcutta. The thesis relates to a detailed study of the biosynthesis of L-ascorbic acid in different species of animals with an attempt to explore any probable relationship between the biosynthetic capacity and species evolution in life science.

I would tender my most sincere thanks to my teacher, Dr. I.B. Chatterjee, Lecturer, Department of Biochemistry, Calcutta University, for his kind interest and valuable suggestions in course of this study. I am deeply indebted to Mr. S. Dutta Gupta for his help in this work. I am also thankful to Miss C. Sengupta and Mr. T.K. Acharyya for their kind assistance.

My grateful thanks are due to Prof. S.C. Roy, D.Sc., Head of the Department of Biochemistry, Drs. A.B. Banerjee and S.K. Basu, Mr. A. Mondal, Mr. J.R. Bhattacharyya, Miss S. Mukherjee and all other colleagues of the Department of Biochemistry, Calcutta University; Drs. D. Ray Chaudhuri, A. Ghosh, (Mrs.) I. Ghosh, Mr. T.K. Banerjee, Miss M. Banerjee

and Mr. N.C. Dutta, Department of Zoology; Dr. B. Biswas, Zoological Survey of India; Dr. (Mrs.) M. Gupta, Department of Pharmacology, Jadavpur University, Mr. K. Dhar Gupta, Central Glass & Ceramic Research Institute.

Thanks are also due to Dr. G. Ashwell, Bethesda, Maryland, Dr. B. Sarkar, Toronto, Canada, Mr. Usharanjan Ray, University of Illinois, U.S.A. and Dr. S. Ikeda, Japan.
